Listening transcript — Part A

Leo: Helpdesk, Leo speaking.

Amira: Hi Leo, it's Amira from Accounts. I've got a problem with the multifunction printer on the second floor.

Leo: OK. What happened?

Amira: I was scanning some invoices when the machine made a loud noise and stopped. There's a red light on the screen now.

Leo: Did you print anything before that?

Amira: Yes. This morning I printed a fifty-page report, and that worked fine. But while I was scanning the invoices, I think a staple went into the machine.

Leo: That's probably the problem. Staples often cause jams. Did you open the cover?

Amira: Yes, I opened the front cover, but I didn't see anything.

Leo: The scanner has a separate cover on the top. Please don't try to remove the staple yourself, because you could damage the glass. I'll come up after lunch, at about two o'clock.

Amira: Thanks. Can I use another printer in the meantime?

Leo: Yes, the one on the third floor is working. I'll email you its name so that you can add it to your computer.

Answer: an email / email / an e-mail / e-mail / a message / an email message

Giải thích: "That's why I sent an email about it to the whole team yesterday."

Listening transcript — Part B

Paul: Hello, everyone. Last week you learnt how to enter data, so today let's look at formulae, using our department's budget spreadsheet.

Paul: Look at column B. It shows how much we spent on each item in January. To add all these numbers, I typed the SUM function into cell B12. Remember: every formula starts with an equals sign.

Paul: Now look at column C. This is the budget for each item. In column D, I subtracted the money we spent from the budget, so the formula in D2 is C2 minus B2. If the result is negative, we spent too much, and the cell turns red automatically.

Paul: Last month, someone typed a number into cell D5 by mistake, and the formula disappeared. That's why I sent an email about it to the whole team yesterday.

Paul: Finally, in column E, I divided the spending by the budget and multiplied the result by a hundred. This shows the percentage of the budget that we've used. Any questions before you try it yourselves?

Instruction email to Hugo

You are a support technician. Hugo, a sales manager, deleted an important file from the shared drive by mistake this morning. Write an email to Hugo explaining how to restore the file from last night's backup, using the notes below. In your email you must use:
- before or after + -ing at least twice to show the order of the steps (Before restoring…, After opening…);
- by + -ing at least once to explain how to do something (by typing…).
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- open the Backup app on your desktop
- choose last night's date
- find the file: open the Shared Drive folder
- check the file name and date carefully / then click 'Restore'
- open the file / check that it is complete
- reminder: close the Backup app when you've finished

Speaking

2.5 points

Các bài mẫu là gợi ý tham khảo, không phải đáp án đúng duy nhất. Part 1 có câu hỏi mở và không có bài mẫu trong bộ dữ liệu.

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. What did you do last weekend? Describe three things using the past simple, and include at least one negative sentence (I didn't…).

2. How can people save time when they use a computer or phone? Answer with by + -ing (By using keyboard shortcuts, you can…).

3. Tell me about a time when something went wrong while you were using a device. Use the past continuous and the past simple (I was …ing when …).

Part 2 (S2)

Explain how to use a database. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

A new shop assistant needs to use the shop's customer database. Explain how to do each task in the cues. Use by + -ing to say how to do each task (You can find a customer by typing…).

- find a customer: type the name in the search box
- add a new customer: click the 'Add customer' button and fill in the boxes
- see today's sales: run the Daily Sales report
- put customers in alphabetical order: click the top of the Name column
- change a phone number: open the record and type the new number

Required language: By + -ing to explain how to do something: by typing…, by opening…, by running…, by clicking….

Sample response

> Using our customer database is quite easy. You can find any customer by typing their name in the search box at the top of the screen. If the customer is new, you add them by clicking the 'Add customer' button and filling in the boxes. Always check the spelling before you save. At the end of the day, you can see today's sales by running the Daily Sales report. Sometimes you need a list in alphabetical order. You can do that by clicking the top of the Name column. Finally, if a customer gets a new phone number, you change it by opening their record and typing the new number. Remember to save the record before you close it.

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

Yesterday you were working at home when your laptop keyboard stopped working. Phone the IT helpdesk and explain how the problem happened and what you did. Use the past continuous for the actions in progress and the past simple for what happened (I was …ing when …; While I was …ing, …).

- 3 p.m.: you / type a report for your manager
- your cat / jump on the desk → a cup of tea / fall onto the keyboard
- while you / clean the keyboard → the laptop / switch off
- you / restart it → some keys / not work
- you / connect an old USB keyboard → finish the report

Required language: Past continuous for the longer action: I was typing…, While I was cleaning…; Past simple for the shorter action and for what you did: the cup fell…, the laptop switched off, I connected….

Sample response

> Hello, this is Linh from the marketing team. I'm calling about my laptop keyboard. Yesterday I was working at home. At about three o'clock, I was typing a report for my manager when my cat jumped on the desk. She knocked over my cup, and the tea fell onto the keyboard. I quickly unplugged the charger, but while I was cleaning the keyboard with a cloth, the laptop switched off completely. After waiting for ten minutes, I restarted it. It started normally, but some keys didn't work, for example the A and the S. I didn't want to lose any more time, so I connected an old USB keyboard and finished the report with it. Could someone look at the laptop today, please?
