Part A

Listen to the conversation and choose the best answer A, B, C or D (Questions L1–L5).

Mia, a sales manager, asks Felix, the database administrator, how to get some information from the customer database.

L1. What does the marketing team want?

A. A new customer database
B. A list of all customers in Vietnam
C. The email addresses of all staff
D. A list of customers in Da Lat who bought something last year

L2. Which two tables does Mia need for the query?

A. Customers and Products
B. Customers and Orders
C. Orders and Payments
D. Staff and Customers

L3. Where does Mia type 'Da Lat'?

A. In the search box at the top
B. In the Name field
C. In the Criteria row of the City column
D. In a new form

L4. Why does Felix tell Mia to save the query?

A. So that she can run it again next year without starting again
B. So that Marketing can open it
C. Because the database closes automatically
D. Because the query takes a long time to run

L5. What must Mia do before she sends the list to Marketing?

A. Print the list
B. Add the customers' phone numbers
C. Ask Felix to check the list
D. Remove the customers who don't want marketing emails

Part B

Listen to the voice message and answer the questions. Write NO MORE THAN THREE WORDS for each answer (Questions L6–L10).

Nora, a systems administrator, leaves a voice message for Kim, a colleague on the morning shift, about last night's server update.

L6. What time did Nora start work on the update?

Answer (maximum 3 words): _____

L7. Where did Nora back up the three servers?

Answer (maximum 3 words): _____

L8. Which server did Nora update first?

Answer (maximum 3 words): _____

L9. What time did Nora finish?

Answer (maximum 3 words): _____

L10. Which network were the two Sales laptops still connected to?

Answer (maximum 3 words): _____

Part 1A: Matching (R1–R5)

Match the terms (1–5) with the correct definitions (A–F). There is one extra definition that you do not need (Questions 1–5).

A. A line of numbers or words written under each other that goes down a page.

B. In a table, something that uniquely identifies each record.

C. A situation in which a machine does not work because something is stopping a part from moving.

D. The button that you press on a computer when you want to use only capital letters.

E. To organise or move equipment so that it is in the right place and ready to be used.

F. A type of computer screen that you touch in order to tell the computer what to do or to get information.

R1. Deploy _____

R2. Caps Lock _____

R3. Touch screen _____

R4. Primary key _____

R5. Jam _____

Part 1B: Grammar (R6–R12)

Choose the best answer, A, B, C or D.

R6. _____ you back up the customer files yesterday?

A. Do
B. Were
C. Did
D. Have

R7. The update _____ two hours to install yesterday.

A. taked
B. took
C. taken
D. takes

R8. 'How did you find the missing invoice?' '_____ the database for the customer's name.'

A. By searching
B. For search
C. By searched
D. With search

R9. After the technician _____ the new printer, everyone could print again.

A. installing
B. install
C. was install
D. installed

R10. _____ I was copying the files to the NAS, the cable came out.

A. During
B. While
C. For
D. By

R11. The users _____ the new system when the error message appeared.

A. was testing
B. are testing
C. were testing
D. test

R12. When the laptop suddenly _____ off, I lost my work.

A. go
B. goes
C. gone
D. went

Part 1C: Vocabulary (R13–R20)

Choose the best answer, A, B, C or D.

R13. I need last March's sales figures. Can you _____ the database for me?

A. subtract
B. multiply
C. attach
D. query

R14. The new receptionist filled in a _____ with her name, address and bank details.

A. form
B. stylus
C. headset
D. bracket

R15. Could you _____ me through the new booking system? I've never used it before.

A. check
B. multiply
C. walk
D. reset

R16. The router stopped working, so I _____ it to the factory settings.

A. multiplied
B. reset
C. divided
D. attached

R17. Please _____ the new user's details carefully before you create the account.

A. multiply
B. divide
C. subtract
D. check out

R18. To find the average, add the numbers and then _____ the total by the number of items.

A. divide
B. subtract
C. attach
D. reset

R19. A keyboard and a mouse are both _____ devices: they put information into a computer.

A. vertical
B. multifunction
C. input
D. read-only

R20. The NAS device is _____ to the office network, so everyone can save files on it.

A. horizontal
B. attached
C. divided
D. walked

Part 2A: Reading comprehension (R21–R25)

Read the passage and choose the best answer A, B, C or D (Questions 21–25).

> **Incident Report: Ticket Machines at Riverside Cinema**
>
> On Saturday 12th October, the six self-service ticket machines at Riverside Cinema stopped taking card payments for almost two hours. This report explains what happened and what we did.
>
> At 6.40 p.m., the cinema was very busy. About forty customers were buying tickets for the seven o'clock films when the card readers on all six machines suddenly stopped working. Each machine showed the message 'Payment service not available'. While the duty manager was calling the IT helpdesk, staff opened two extra counters and sold tickets by hand.
>
> The technician, Sam Ortiz, connected to the machines from his office. After checking the system logs, he found the cause. The night before, the payment company had installed a software update on all the card readers. The update had a bug, and it stopped the readers when there were more than ten payments in one minute.
>
> Sam could not remove the update himself, so he phoned the payment company. Their engineer removed it at 8.30 p.m., and the machines worked normally again. Two films started fifteen minutes late, and the cinema gave free drinks to about 200 customers.
>
> In future, the payment company will test every update on one machine for a week before installing it on the others. The cinema will also keep a portable card reader at the main counter, so that staff can sell tickets quickly if the machines stop again.

R21. What stopped working at 6.40 p.m.?

- **A.** The cinema's projectors
- **B.** The online booking website
- **C.** The lights in the cinema
- **D.** The card readers on the ticket machines

R22. What did staff do while the duty manager was calling the helpdesk?

- **A.** They restarted the ticket machines.
- **B.** They opened two extra counters and sold tickets by hand.
- **C.** They gave free drinks to all the customers.
- **D.** They closed the cinema for the evening.

R23. How did Sam find the cause of the problem?

- **A.** By visiting the cinema
- **B.** By phoning the payment company
- **C.** By checking the system logs
- **D.** By testing his own card

R24. When did the bug stop the card readers?

- **A.** When there were more than ten payments in one minute
- **B.** Every evening at 6.40 p.m.
- **C.** When customers paid in cash
- **D.** When the films started

R25. What will the payment company do in future?

- **A.** Stop updating the card readers
- **B.** Send an engineer to the cinema every Saturday
- **C.** Give free drinks to customers
- **D.** Test every update on one machine for a week first

Part 2B: True / False (R26–R30)

Read the email and write T (True) or F (False) (Questions 26–30).

> **Problems with the September sales report**
>
> Hi team,
>
> Last week, the monthly sales report showed that we sold £86,000 of goods in September. This number looked too high, so Karen in Finance checked the spreadsheet on Monday.
>
> She found two problems. First, someone copied some of the October sales into the September sheet. Second, the formula in the Total column added the tax twice. Karen corrected both problems, and the real total for September was £71,500.
>
> Before sending the report again, she asked Tom to check all the other formulae. While he was checking them, he found another small error in the Returns column, but it did not change the total. Karen then sent the corrected report to the directors on Tuesday afternoon.
>
> To stop these problems in future, we are going to protect all the cells with formulae, so that only the finance team can change them. Please don't copy data into the report by hand any more. From next month, the report will take the numbers directly from the sales database.
>
> Thanks,
>
> Ruth Evans, Finance Manager

R26. The first total for September looked too low.

☐ True ☐ False

R27. Karen checked the spreadsheet on Monday.

☐ True ☐ False

R28. The formula in the Total column added the tax twice.

☐ True ☐ False

R29. The error that Tom found changed the total.

☐ True ☐ False

R30. From next month, staff will copy the sales data into the report by hand.

☐ True ☐ False

Writing

2.5 points

Part A: Translation (W31–W35)

Translate these sentences into Vietnamese (Questions 31–35).

W31. The technician replaced the broken keyboard and tested all the keys.

W32. By linking the Orders table to the Customers table, you can see who bought each product.

W33. Before installing the new graphics card, back up all your files.

W34. While the trainer was using the touch screen, the system suddenly froze.

W35. Each worksheet in this file shows the sales for one month of the year.

Part B: Instruction email

You are a support technician. Daisy, a new receptionist, often uses the office printer, and this morning the paper got stuck inside it. Write an email to Daisy explaining how to clear a paper jam, using the notes below. In your email you must use:
- before or after + -ing at least twice to show the order of the steps (Before opening…, After removing…);
- by + -ing at least once to explain how to do something (by looking…).
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- switch off the printer / unplug it (before opening the cover)
- open the front cover / take out the paper tray
- pull the stuck paper out slowly with both hands
- check for small pieces of paper: look inside with a torch
- put the tray back / close the cover
- plug the printer in / switch it on / print a test page
- reminder: wash your hands when you've finished

Required language: Before / after + -ing (at least twice): Before opening the cover, switch off…; After removing the paper, check…; By + -ing (at least once): check for small pieces by looking inside with a torch; Imperatives with sequence words for the steps.

Write 80–100 words in the body: count from the greeting through the signature; exclude From / To / Date / Subject.

From: _____

To: Daisy

Date: _____

Subject: _____

Hi / Dear Daisy,

It should be quite easy to _____ .

First, _____ .

Then, _____ .

Next, _____ .

After that, _____ .

Finally, _____ .

Don't forget to _____ when you've finished.

Best wishes,

[Full name] _____

[Job title] _____

[Department] _____

Speaking

2.5 points

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. Tell me about the first computer or phone you had. When did you get it, and what did you use it for? Use the past simple.

2. What do you do before starting and after finishing an assignment on a computer? Use before + -ing and after + -ing (Before starting…, After finishing…).

3. What were you doing at eight o'clock yesterday evening? Did anything interrupt you? Use the past continuous and the past simple (I was …ing when …).

Part 2 (S2)

Talk about a spreadsheet you made. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

Last term you made a spreadsheet to follow your marks in one subject. Explain what you did and which formulae you used. Use the past simple (I made…, I typed…, I divided…) and spreadsheet words such as column, row, cell, minus, divide and brackets.

- one row for each test, one column for each part of the test
- the marks for the three parts of each test in columns B, C and D
- column E: (B+C+D) divided by three, with brackets, for the average
- column F: the target mark minus the average
- the cell turned green when the average was higher than the target

Required language: Past simple for finished actions: I made…, I typed…, I divided…; Spreadsheet language: column, row, cell, minus, divide, brackets.

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

Yesterday a new colleague, Lan, could not log in to her account. A colleague from another office phones you and asks what happened. Use the cues to explain how the problem occurred and what you did. Use the past continuous for the actions in progress and the past simple for what happened (She was …ing when …; While I was …ing, …).

- 9.30 a.m.: Lan / prepare the monthly report
- her laptop / restart for an update → she / log in again
- Caps Lock / be on → she / type the wrong password three times → the system / lock her out
- while you / reset her password → she / use a colleague's laptop
- after resetting it → you / show her the Caps Lock light

Required language: Past continuous for the longer action: She was preparing…, While I was resetting…; Past simple for the shorter action and for what you did: the laptop restarted, the system locked her out, I showed….
