ANSWER KEY & REFERENCE RESPONSES

Listening: answers and transcripts

Part A

Lucy and Owen run a small gift shop. They compare three security camera kits for the shop.

L1. How much does the HomeEye kit cost?

Answer: D — £190

Giải thích: Owen nói HomeEye rẻ nhất, "It costs a hundred and ninety pounds for four cameras". 260 bảng là SafeView, 340 bảng là Guardian, 80 bảng là chênh lệch giữa SafeView và Guardian.

L2. What is the main advantage of the Guardian kit?

Answer: A — It has the clearest picture.

Giải thích: "Its picture is clearer than the others, especially at night". Guardian đắt nhất; ứng dụng dễ dùng nhất là của SafeView; số camera không được so sánh.

L3. How long does the HomeEye kit keep recordings?

Answer: B — Seven days

Giải thích: "HomeEye only keeps them for seven days". Ba mươi ngày là của SafeView và Guardian; hai tuần là yêu cầu của công ty bảo hiểm.

L4. Why is the HomeEye kit not suitable for the shop?

Answer: C — It does not keep recordings for long enough.

Giải thích: Công ty bảo hiểm yêu cầu lưu ít nhất hai tuần, mà HomeEye chỉ lưu bảy ngày, nên "HomeEye isn't suitable for us". Cả ba bộ đều có ứng dụng điện thoại.

L5. Why does Lucy choose the SafeView kit?

Answer: B — It is cheaper than Guardian and has a better app.

Giải thích: Lucy nói "It's eighty pounds cheaper than Guardian, and the app is better". Hình rõ nhất là Guardian; rẻ nhất là HomeEye.

Listening transcript — Part A

Lucy: Owen, have you looked at the security cameras for the shop?

Owen: Yes, I've found three kits. The HomeEye kit is the cheapest. It costs a hundred and ninety pounds for four cameras.

Lucy: That's not bad. What about the other two?

Owen: The SafeView kit costs two hundred and sixty pounds, and the Guardian kit is the most expensive at three hundred and forty.

Lucy: Is the Guardian much better?

Owen: Its picture is clearer than the others, especially at night. But the SafeView picture is almost as good. And SafeView keeps recordings for thirty days, the same as Guardian. HomeEye only keeps them for seven days.

Lucy: Hmm. Our insurance company says we need to keep recordings for at least two weeks.

Owen: Right, so HomeEye isn't suitable for us.

Lucy: What about the phone app? I want to check the shop from home.

Owen: All three kits have an app, but the reviews say the SafeView app is the easiest to use.

Lucy: Then I think we should choose SafeView. It's eighty pounds cheaper than Guardian, and the app is better.

Owen: I agree. I'll order it this afternoon.

Part B

Ruth, an IT consultant, leaves a voicemail for the manager of the Lakeside Hotel about the hotel's Wi-Fi.

L6. Which floor has the weakest Wi-Fi signal?

Answer: the third floor / third floor / third / the 3rd floor / 3rd floor / 3rd

Giải thích: Ruth nói "the signal on the third floor is the weakest in the building".

L7. How many more access points does Ruth recommend?

Answer: two / 2 / two more / 2 more / two access points / 2 access points

Giải thích: "I recommend adding two more access points on that floor".

L8. What type of internet connection does Ruth recommend?

Answer: fibre / a fibre connection / fibre connection / fiber / a fiber connection / fiber connection

Giải thích: "I think you should change to a fibre connection" (cáp quang), chỉ đắt hơn kết nối hiện tại 20 bảng mỗi tháng.

L9. What should the hotel have for its guests?

Answer: a separate network / separate network / a guest network / guest network / their own network / separate guest network / network for guests

Giải thích: "it's best to have a separate network for guests, so they can't see your office computers".

L10. On which day can Ruth do the work?

Answer: tuesday / next tuesday / on tuesday / on next tuesday

Giải thích: "I can do all the work next Tuesday, and it should take about four hours".

Listening transcript — Part B

Ruth: Hello, Mr Novak. This is Ruth Carter from NetPoint Consulting. I've finished looking at the Wi-Fi at the Lakeside Hotel, and I'd like to give you my recommendations.

Ruth: At the moment, you have six access points, but the signal on the third floor is the weakest in the building, and guests there often complain. I recommend adding two more access points on that floor. Each one costs ninety-five pounds, and that price includes installation.

Ruth: Second, your internet connection is too slow for forty rooms. Many guests stream films in the evening, so they need more speed. I think you should change to a fibre connection. It's more expensive than your current connection, but only by twenty pounds a month.

Ruth: Finally, it's best to have a separate network for guests, so they can't see your office computers. I can do all the work next Tuesday, and it should take about four hours. Could you call me back and let me know whether Tuesday is convenient? Thanks. Bye.

Instruction email to Sofia

You are an IT technician. The company has bought ShieldPro, a new antivirus program, for its 15 computers. Sofia, the office manager, is going to install it while you are away. Write an email to Sofia explaining the steps, using the notes below. In your email you must use:
- at least one comparative or superlative (faster than, the safest);
- the verbs cost or come to to talk about the price;
- at least one recommendation (I recommend…, I think it's best to…);
- at least one indirect question (Could you let me know whether…?).
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- ShieldPro: faster than the old antivirus
- insert the USB stick / run the installer on each computer
- licence: £20 per computer (15 computers: £300)
- enter the licence key / restart the computer
- recommend a full scan the first time (the safest option)
- ask Sofia to tell you whether any computer shows an error message
- reminder: return the USB stick to the IT office

Model email

> From: Tran Quoc Bao
> To: Sofia
> Date: 12th May
> Subject: Installing ShieldPro
>
> Hi Sofia,
>
> It should be quite easy to install ShieldPro, which is faster than our old antivirus.
> First, insert the USB stick and run the installer on each computer.
> Then, enter the licence key. Each licence costs £20, so all fifteen come to £300.
> Next, restart the computer.
> After that, I recommend running a full scan because it's the safest option.
> Finally, could you let me know whether any computer shows an error message?
> Don't forget to return the USB stick to the IT office when you've finished.

Speaking

2.5 points

Các bài mẫu là gợi ý tham khảo, không phải đáp án đúng duy nhất. Part 1 có câu hỏi mở và không có bài mẫu trong bộ dữ liệu.

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. Think about two shops or websites where people buy technology. Which one is better, and why? Use comparatives and superlatives (cheaper than, more reliable than, the best).

2. How much do you usually pay for your mobile phone plan or home internet each month? Is it good value? Use cost, pay, spend or come to.

3. A friend wants to buy their first laptop for university. What advice would you give? Use at least two recommendation structures (I think you should…, I recommend…, it's best to…).

Part 2 (S2)

Compare the products and give a recommendation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

A friend runs a small design studio and needs a new printer. The studio prints about 2,000 colour pages a month. Compare the three printers in the cues and recommend one. Use comparatives and superlatives, and at least one recommendation structure (I recommend…, I think you should…, it's best to…).

- InkJet 50: £120 / colour / 15 pages a minute / 8p per page
- LaserMono: £260 / black and white only / 30 pages a minute / 3p per page
- ColourLaser 9: £420 / colour / 25 pages a minute / 5p per page
- the studio: about 2,000 colour pages a month

Required language: Comparatives and superlatives: cheaper than, faster than, the most expensive, the lowest; Recommendations: I recommend + -ing / that you + verb; I think you should…; it's best to….

Sample response

> I've compared three printers for your studio. The InkJet 50 is the cheapest to buy at a hundred and twenty pounds, but it's also the slowest, and each page costs eight pence, which is more than the other two. The LaserMono is faster than the InkJet and its pages are the cheapest, only three pence each, but it prints in black and white only, so it's no good for design work. The ColourLaser 9 is the most expensive printer at four hundred and twenty pounds, but it prints in colour, it's almost as fast as the LaserMono, and each page costs five pence. You print about two thousand colour pages a month, so you'd save sixty pounds a month compared with the InkJet. I recommend buying the ColourLaser 9. I think it's best to order spare toner at the same time.

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

Your office ordered new equipment from an IT supplier, but the invoice is wrong. Phone the supplier. Explain what you ordered and what everything should cost, using cost and come to and saying the prices clearly. Then ask at least three polite indirect questions (Could you tell me why…?, Do you know whether/if…?, Can you tell me when…?).

- your order: 6 webcams at £60 each / 6 docking stations at £110 each
- correct total: £1,020
- the invoice says 12 webcams / total £1,380
- you want: the reason for the mistake, a new invoice, the delivery date

Required language: Talking about money: The webcams cost…; the order comes to…; we paid / we spent…; Saying prices: sixty pounds; one thousand and twenty pounds; one thousand three hundred and eighty pounds; Indirect questions (at least three): Could you tell me why the invoice says…?; Do you know whether you can send…?; Can you tell me when the equipment will arrive?.

Sample response

> Hello, this is Linh from Greenfield Accounting. I'm calling about our invoice, because I think there's a mistake. We ordered six webcams and six docking stations. Each webcam costs sixty pounds, so the webcams come to three hundred and sixty pounds. The docking stations cost a hundred and ten pounds each, so they come to six hundred and sixty pounds. Altogether, the order should come to one thousand and twenty pounds. However, the invoice says twelve webcams, and the total is one thousand three hundred and eighty pounds. That's three hundred and sixty pounds more than it should be. Could you tell me why the invoice shows twelve webcams? Do you know whether you can send us a new invoice today? And can you tell me when the equipment will arrive? Thank you very much.
