Part A

Listen to the conversation and choose the best answer A, B, C or D (Questions L1–L5).

Kate, the manager of a garden supplies company, talks to Tom, a web developer, about building an online shop.

L1. Why does Kate want to start an online shop?

A. Her staff want to work from home.
B. Sales in her shops are going down.
C. Her shops are closing next year.
D. Delivery is getting cheaper.

L2. What does Tom say about the user interface?

A. It is the most difficult part to build.
B. It sends orders to the warehouse.
C. It is only needed on mobile phones.
D. It must look good and be easy to use.

L3. What happens when a customer's payment goes through?

A. The order goes to the warehouse team.
B. The customer gets a paper receipt.
C. Kate phones the customer to check.
D. The system deletes the card details.

L4. Why must the website work well on phones?

A. Kate's warehouse staff use phones.
B. Phones are getting cheaper every year.
C. More people shop on phones than on laptops.
D. Tom only builds apps for phones.

L5. When will the first version of the online shop be ready?

A. In two weeks
B. In six weeks
C. Next Monday
D. In six months

Part B

Listen to the announcement and answer the questions. Write NO MORE THAN THREE WORDS for each answer (Questions L6–L10).

David, an IT trainer, gives staff information about training sessions on the company's new enterprise social networking system.

L6. On which day is the first training session?

Answer (maximum 3 words): _____

L7. In which room is the first session?

Answer (maximum 3 words): _____

L8. Which feature groups all the messages from one conversation together?

Answer (maximum 3 words): _____

L9. What should staff bring to the second session?

Answer (maximum 3 words): _____

L10. How many places are there in each session?

Answer (maximum 3 words): _____

2.5 points · 30 questions

Part 1A: Matching (R1–R5)

Match the terms (1–5) with the correct definitions (A–F). There is one extra definition that you do not need (Questions 1–5).

A. A technology that lets two nearby devices exchange data.

B. An online place where customers keep items before paying.

C. Software used to organise, store and share company documents.

D. A service for posting very short updates.

E. A method of making a digital file smaller.

F. A system that controls how purchased digital content can be used.

R1. Microblogging system _____

R2. Data compression _____

R3. Shopping basket _____

R4. Document management system _____

R5. NFC _____

Part 1B: Grammar (R6–R12)

Choose the best answer, A, B, C or D.

R6. The number of employees using our company network _____ this year.

A. increase
B. is increasing
C. are increasing
D. increasing

R7. Staff are becoming _____ interested in online document collaboration.

A. more and more
B. most and most
C. much and more
D. the more

R8. If we _____ high-definition cameras, our overseas meetings would be clearer.

A. buy
B. will buy
C. bought
D. buying

R9. If we moved the intranet to a faster server, staff _____ less time waiting for pages to load.

A. will spend
B. spend
C. spent
D. would spend

R10. Our shop sends order data to the accounting system in a standard format _____ EDI (Electronic Data Interchange).

A. call
B. calls
C. called
D. calling

R11. Could someone tell me how _____ a refund in the new order system?

A. process
B. to process
C. processing
D. processed

R12. I'd like _____ how to create a new group in the company forum.

A. knowing
B. know
C. to know
D. known

Part 1C: Vocabulary (R13–R20)

Choose the best answer, A, B, C or D.

R13. Online shops store small _____ on your computer so that the website recognises you on your next visit.

A. graphs
B. forums
C. trends
D. cookies

R14. As well as our website, we have four _____ shops where customers can see the products face-to-face.

A. high-definition
B. bricks-and-mortar
C. file sharing
D. speech-to-text

R15. In a video conference, the _____ participants are in the same room as you, while the others join from different locations.

A. local
B. remote
C. overseas
D. absent

R16. The new chat tool will _____ with our email and calendar software, so staff can use all three together.

A. archive
B. prefer
C. decrease
D. integrate

R17. B2B stands for _____.

A. business to business
B. business to buyer
C. bank to business
D. browser to browser

R18. An MCU is used to connect several _____ locations at the same time.

A. delivery
B. payment
C. video conferencing
D. printing

R19. E-commerce companies use _____ to protect customers' card details when they are sent over the internet.

A. tagging
B. encryption
C. archiving
D. syncing

R20. With _____ recognition, staff can give commands to the system by speaking instead of typing.

A. voice
B. image
C. pattern
D. face

Part 2A: Reading comprehension (R21–R25)

Read the passage and choose the best answer A, B, C or D (Questions 21–25).

> **Connecting Teams at Linden Systems**
>
> Linden Systems is a medium-sized IT company with offices in three countries. In the past, employees in different departments communicated mainly by long email chains. Important messages were often difficult to find, and staff in one office rarely knew who in another office could answer their questions. Last year, the managers decided to introduce an enterprise social networking system.
>
> The new system provides instant messaging, forums and profile pages. Staff use instant messaging to ask quick questions, while the forums are useful for longer discussions about projects. Every employee also has a profile page that shows their job, their skills and the projects they are working on. This means that it is now easy to find the right person to ask, even in another country.
>
> Since the system was introduced, the way people communicate has changed. The number of internal emails is going down every month, and more and more staff are using the forums to work with colleagues in the overseas departments. Many teams say they are getting answers much faster than before. The system is also becoming more popular with managers, who now use it to post company announcements.
>
> However, there are still some problems. Many employees work away from the office when they visit customers, and at the moment they cannot use the system on their phones. The IT department will introduce a mobile app next month so that staff can read messages and join discussions wherever they are.

R21. Why did Linden Systems introduce an enterprise social networking system?

- **A.** To sell more products online
- **B.** To make communication between staff easier
- **C.** To reduce the number of employees
- **D.** To increase travel between offices

R22. What do employees mainly use instant messaging for?

- **A.** Asking quick questions
- **B.** Long project discussions
- **C.** Making online payments
- **D.** Company announcements

R23. How can staff now find the right colleague to answer a question?

- **A.** By sending long email chains
- **B.** By reading company announcements
- **C.** By looking at profile pages
- **D.** By using the mobile app

R24. What is happening to the number of internal emails?

- **A.** It is going up quickly.
- **B.** It is staying the same.
- **C.** It doubled last year.
- **D.** It is going down every month.

R25. What will the IT department do next month?

- **A.** Close the overseas offices
- **B.** Stop using the forums
- **C.** Train managers to post news
- **D.** Introduce a mobile app

Part 2B: True / False (R26–R30)

Read the passage and write T (True) or F (False) (Questions 26–30).

> **Choosing a Video Meeting System**
>
> A small design firm has two offices in different cities. Its manager is deciding whether to buy videophones or a complete video conferencing system. A videophone is cheaper and is useful when only two people need to speak. However, the design team often needs to hold meetings with several people at different locations. For this reason, a complete system may be more suitable.
>
> The proposed system would connect more than two locations. It includes high-definition monitors, cameras and a control panel, and it needs a dedicated room. The equipment cannot be kept in a shared office, so the firm will turn one of its meeting rooms into a video conferencing room. If the firm bought the system, staff would be able to discuss designs without travelling as often. The initial price is higher than the price of videophones, but the manager expects fewer business trips to reduce costs in the long term.
>
> Before making a final decision, the manager wants more information about maintenance costs and training. She knows that employees will need to learn how to operate the new equipment correctly.

R26. A videophone is the cheaper option for the firm.

☐ True ☐ False

R27. The design team always holds meetings with exactly two people.

☐ True ☐ False

R28. The equipment for the complete system can be kept in a shared office.

☐ True ☐ False

R29. The manager believes the complete system could save money over time.

☐ True ☐ False

R30. The manager is not interested in training needs.

☐ True ☐ False

Writing

2.5 points

Part A: Translation (W31–W35)

Translate these sentences into Vietnamese (Questions 31–35).

W31. The number of employees using our enterprise social networking system is increasing steadily.

W32. If we had a video conferencing system, we would spend less money on business travel.

W33. Data compression reduces the size of files, so they need less bandwidth when they are sent.

W34. A document management system allows employees to store, share and find company files.

W35. Could you tell me how to archive old messages in the company system?

Part B: Instruction email

You are an IT support technician. Tomorrow a new employee, Hana, will join a video conference with the company's overseas office for the first time. Write an email explaining how to join the video conference, using the steps below. In your email you must use:
- imperatives and sequence words for the steps;
- at least one polite request (Could you…? / It would be great if you could…), for example asking Hana to come early to test the equipment;
- at least one second conditional sentence (If + past simple, … would + verb), for example to explain what would happen if the remote participants heard background noise.
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- switch on the video conferencing equipment
- check the camera and microphone connections
- open the conferencing application
- enter the meeting ID and select “Join”
- check that remote participants appear on the screen
- mute the microphone when you are not speaking
- leave the meeting and switch off the equipment

Required language: Polite requests (at least one): Could you…?, It would be great if you could…, can/could; Second conditional (at least one): If + past simple, would + infinitive; Imperatives with sequence words (first, then, next, after that, finally) for the steps.

Write 80–100 words in the body: count from the greeting through the signature; exclude From / To / Date / Subject.

From: _____

To: Hana

Date: _____

Subject: _____

Hi / Dear Hana,

It should be quite easy to _____ .

First, _____ .

Then, _____ .

Next, _____ .

After that, _____ .

Finally, _____ .

Don't forget to _____ when you've finished.

Best wishes,

[Full name] _____

[Job title] _____

[Department] _____

Speaking

2.5 points

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. How are you and your friends communicating online these days? Describe one way that is becoming more popular and one way that is becoming less popular. Use the present continuous and phrases such as more and more, is getting/becoming + comparative, or is going up/down.

2. Imagine your university has just started using a new online learning system. What would you like to learn about it? Make at least two polite requests for training, using It would be great to know…, I'd like to know… or Could someone tell me…?

3. If your university had a video conferencing system for all classes, how would your studies be different? Answer with the second conditional (If + past simple, … would + verb).

Part 2 (S2)

Explain the terms to a colleague. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

A new colleague in the sales department is reading a report about your company's online shop but does not understand some e-commerce terms. Explain what each term in the cues means and give an example for each one. Give the meanings in at least two different spoken ways: called, which means, or is.

- B2C
- bricks and clicks
- DRM
- encryption
- Ways to give meanings: … called …, … which means …, … is …

Required language: Give meanings in at least two of these three ways (all three are not required):; called: a business model called bricks and clicks; which means / relative clause: B2C, which means business to consumer, …; be: DRM is….

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

You are an IT officer at a travel company. At the monthly meeting, your manager asks you how communication with customers and staff is changing. Use the cues to describe the current trends. Use the present continuous, more and more, get/become + comparative, and verbs such as increase, decrease, go up and go down. Then suggest one thing the company should do.

- customer emails to the help desk: going down
- customers using live chat on the website: more and more
- staff working from home: increasing
- the current enterprise social network: getting slower
- voice recognition: becoming more popular

Required language: Present continuous for changes happening now: Customer emails are going down.; more and more + noun / comparative + and + comparative; get/become + comparative adjective: The system is getting slower.; increase, decrease, go up, go down.
