Listening transcript — Part A

Ahmed: IT help desk, Ahmed speaking.

Lena: Hi Ahmed, it's Lena from Accounts. We started using the new expenses app on Monday, and my team is having a few problems. Could someone give us some training?

Ahmed: Of course. What would you like to learn?

Lena: Well, it would be great to know how to scan receipts with our phones. At the moment we're typing everything in by hand, and it takes ages.

Ahmed: That's easy to fix. Anything else?

Lena: Yes. I'd also like to know how to approve my team's claims. I'm the manager, and I'm getting more and more requests every week.

Ahmed: OK. How many people are in your team?

Lena: Eight, including me.

Ahmed: Then I can come to your office instead of booking the training room. Would Thursday morning suit you?

Lena: Thursday's difficult, because we're closing the monthly accounts. Could you come on Friday instead?

Ahmed: Friday at eleven is fine. It'll take about an hour. Could you ask everyone to bring their phones, with the app already installed?

Lena: Sure. And could you send me the instructions before then?

Ahmed: No problem. I'll email them this afternoon.

Listening transcript — Part B

Dr Patel: Good morning, everyone. I'm pleased to tell you that our new video conferencing room opens on the fourteenth of March. It's on the second floor of the library, in Room 204.

Dr Patel: The room has seats for sixteen people, a very large screen and four microphones on the table. Lecturers can use it to invite guest speakers from other countries. Last year we paid almost nine thousand pounds for speakers' flights and hotels. If we used video conferencing for half of these talks, we would save around four thousand pounds a year.

Dr Patel: Students can also book the room for project meetings with our partner universities in Japan and Australia. To book, please use the online form on the IT website at least two days before your meeting.

Dr Patel: If you have never used this kind of equipment before, don't worry. Our technician, Mr Lewis, gives a short introduction every Wednesday at two o'clock. Thank you.

Instruction email to Mia

You are an IT support technician. More and more staff are using TeamTalk, the company's instant messaging app, on their phones. Mia, a new sales assistant, wants to install it. Write an email to Mia explaining the steps, using the notes below. In your email you must use:
- imperatives and sequence words for the steps;
- at least one sentence describing a current trend (present continuous or more and more);
- at least one second conditional sentence (If + past simple, … would/could + verb), for example to explain what would happen if she didn't set her status to "Away";
- at least one polite request (Could you…? / It would be great if you could…), for example asking Mia to send you a test message.
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- download TeamTalk from the app store
- sign in with your work email and password
- join the channel for the sales department
- set your status to 'Away' when you are out (if not: colleagues would expect a quick reply)
- ask Mia to send you a test message
- reminder: lock your phone

Speaking

2.5 points

Các bài mẫu là gợi ý tham khảo, không phải đáp án đúng duy nhất. Part 1 có câu hỏi mở và không có bài mẫu trong bộ dữ liệu.

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. How is the way students study changing these days? Describe two trends. Use the present continuous and words such as more and more, is getting/becoming + comparative, or is increasing/decreasing.

2. If your class had a video conference with students in another country, what would you talk about, and what would you learn? Answer with the second conditional (If we had…, we would…).

3. You want to learn how to use a new app for your studies. Make at least two polite requests to your teacher (It would be great to know…, Could you show me…?, I'd like to know…).

Part 2 (S2)

Explain the terms. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

Your grandparents are starting to shop online, but they do not understand some words on shopping websites. Explain what each term in the cues means and give a simple example. Give the meanings in at least two different spoken ways: called, which means, or is.

- shopping basket
- cookie
- NFC payment
- B2B

Required language: Giving meanings in at least two of three ways (called / which means / be): a small file called a cookie; B2B, which means business to business; A shopping basket is….

Sample response

> Let me explain some words you will see on shopping websites. First, the shopping basket is the place on the website where you keep the things you want to buy before you pay. It's like a real basket in a supermarket. Next, many websites save a small file called a cookie on your computer. The cookie helps the website remember you, so next time it can show your basket again. Then there's NFC payment, which means you can pay by holding your phone or bank card near the card machine. You don't need to type a PIN for small amounts. Finally, you may see B2B, which means business to business. These are websites where companies sell to other companies, so you probably won't use them.

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

You are the IT manager of a supermarket chain. Your manager asks how customers' shopping habits are changing and whether the supermarket should buy self-checkout machines. First, describe the current trends in the cues with the present continuous, more and more, get/become + comparative, or go up/go down. Then explain what would happen if the supermarket bought the machines, with at least two second conditional sentences (If we bought…, customers would…).

- online orders: going up by about 20% a year
- cash payments: going down
- phone payments: more and more popular
- queues at weekends: getting longer
- proposal: ten self-checkout machines (£4,000 each)

Required language: Present continuous for current changes: Online orders are going up.; more and more + noun; get/become + comparative adjective: Queues are getting longer.; Second conditional (at least two sentences): If we bought the machines, customers would wait less..

Sample response

> Our customers' habits are changing quickly. Online orders are going up by about twenty percent a year, and cash payments are going down. More and more people are paying with their phones, because it's faster. However, the queues at weekends are getting longer, and some customers are complaining. That's why I think we should buy ten self-checkout machines. Each machine costs four thousand pounds. If we bought them, customers with only a few items would pay in less than a minute, so the queues would get shorter. If the machines accepted phone payments, they would be very popular with younger customers. Also, if we had self-checkouts, our staff could spend more time helping customers in the shop.
