Part A

Listen to the conversation and choose the best answer A, B, C or D (Questions L1–L5).

Tom, a student, shows his teacher, Ms Reed, a quiz app that he wrote for his programming class.

L1. How long does the user have to answer each question?

A. Ten seconds
B. Fifteen seconds
C. Twenty seconds
D. Thirty seconds

L2. What happens when the user chooses the correct answer?

A. The screen flashes green.
B. The screen flashes red.
C. Ten points are taken away.
D. The timer starts again at zero.

L3. What happens when the timer reaches zero?

A. The app closes.
B. The app moves to the next question.
C. The user loses ten points.
D. The app shows the correct answer.

L4. Why did the app crash after question ten?

A. The question file was too big.
B. The timer was too short.
C. Tom used the wrong number in a loop.
D. The phone's battery was low.

L5. What does Ms Reed ask Tom to add?

A. More questions
B. A longer timer
C. A help page
D. A high score screen

Part B

Listen to the team briefing and answer the questions. Write NO MORE THAN THREE WORDS for each answer (Questions L6–L10).

Helen, a project manager, tells her team about the plan for the next two weeks of a website project for an online shop.

L6. Which pages are the developers starting work on today?

Answer (maximum 3 words): _____

L7. Who is coming on Thursday?

Answer (maximum 3 words): _____

L8. How many days will the customer service team have for testing?

Answer (maximum 3 words): _____

L9. On which date is the client visiting the office?

Answer (maximum 3 words): _____

L10. Who should the team send design questions to next week?

Answer (maximum 3 words): _____

2.5 points · 30 questions

Part 1A: Matching (R1–R5)

Match the terms (1–5) with the correct definitions (A–F). There is one extra definition that you do not need (Questions 1–5).

A. A mathematical quantity shown by a letter of the alphabet or a sign.

B. Testing software to see whether it works properly, done by the company that is writing it.

C. Two or more different things that exist together or are used together.

D. A row of letters or numbers that makes up part of a set of instructions for a computer.

E. A detailed instruction about how something should be made or what it should do.

F. Website information of very high quality that you often need to pay to access.

R1. Alpha testing _____

R2. Line of code _____

R3. Specification _____

R4. Premium content _____

R5. Value _____

Part 1B: Grammar (R6–R12)

Choose the best answer, A, B, C or D.

R6. The new app _____ work on both Android and iPhone.

A. ought
B. should
C. need
D. have

R7. Our users want the search results _____ by price.

A. be sorted
B. being sorted
C. to be sorted
D. to sorting

R8. This program _____ by a student in our class last year.

A. was written
B. wrote
C. is writing
D. has written

R9. Customers' passwords _____ in an encrypted form on the server.

A. store
B. are storing
C. stored
D. are stored

R10. Pressing Ctrl and Z makes the program _____ your last action.

A. undo
B. to undo
C. undoing
D. undone

R11. A loose cable caused the printer _____ every few minutes.

A. stop
B. to stop
C. stopping
D. stopped

R12. The new laptops for the design team are due _____ next Monday.

A. arriving
B. arrive
C. to arrive
D. arrived

Part 1C: Vocabulary (R13–R20)

Choose the best answer, A, B, C or D.

R13. Our team has three _____ who write the programs for the app and one designer who draws the screens.

A. managers
B. programmers
C. customers
D. clients

R14. Our new team leader is very _____: she is full of energy and always has new ideas.

A. dynamic
B. private
C. versatile
D. quiet

R15. In the car factory, a _____ paints each car in less than a minute without any help from people.

A. scanner
B. printer
C. robot
D. keyboard

R16. This Wi-Fi network is _____, so anyone in the station can use it.

A. private
B. secure
C. slow
D. public

R17. The report is _____ online, but you cannot edit it or download it.

A. viewable
B. editable
C. versatile
D. private

R18. Making the app work with a very slow internet connection was a real _____ for the team.

A. headset
B. challenge
C. schedule
D. purchase

R19. The app crashed because of a _____ in the program, so the developers had to fix it.

A. schedule
B. headset
C. bug
D. purchase

R20. Finishing the first working version was an important _____ in the project, so the team celebrated.

A. headset
B. purchase
C. schedule
D. milestone

Part 2A: Reading comprehension (R21–R25)

Read the passage and choose the best answer A, B, C or D (Questions 21–25).

> **A New Website for Oakfield Sports Centre**
>
> Oakfield Sports Centre's old website was built eight years ago. It did not display well on phones, and class times were difficult to find. Last year, more than half of the visitors left the site after looking at only one page. For these reasons, the centre's manager, Paula Grey, asked a web design company, Pixelworks, to create a new site.
>
> The new site is divided into four main sections: Timetable, Membership, Facilities and Contact. The Timetable section is updated every day by the reception staff, and all classes can now be booked online. In the Facilities section, each room is shown with photos and a short video, so new members know what to expect before they visit. The whole site uses the centre's colours, blue and white, and the same large, clear buttons on every page.
>
> Before it was launched, the site was tried out by twenty members. They said that the booking form was too long, so it was shortened from twelve boxes to five. The members also asked for a search box, and one was added to the top of every page.
>
> Since the launch in March, the number of online bookings has doubled, and the reception staff receive far fewer phone calls. The manager now plans to add an area where members can check their payments and change their address or phone number. This new area is due to be ready in the autumn.

R21. What was one problem with the old website?

A. It was too expensive to run.
B. It did not display well on phones.
C. It was updated by too many people.
D. It did not show any class times.

R22. Who updates the Timetable section?

A. The reception staff
B. Pixelworks
C. The manager
D. The members

R23. What change was made after twenty members tried out the site?

A. A video was added to every page.
B. The Contact section was removed.
C. The booking form was made shorter.
D. Twelve new sections were added.

R24. What has happened since the new site was launched?

A. Reception receives more phone calls.
B. Half of the visitors leave after one page.
C. The centre has closed its reception.
D. Online bookings have doubled.

R25. When is the new area for members due to be ready?

A. In March
B. In the autumn
C. Next week
D. In eight years

Part 2B: True / False (R26–R30)

Read the passage and write T (True) or F (False) (Questions 26–30).

> **A Self-Service Screen for Pho House**
>
> Pho House is a busy noodle restaurant in Hanoi. At lunchtime, customers often wait ten minutes just to order their food. Some customers give up and go to another restaurant. The owner, Mr Quang,

wants a self-service screen near the door so that customers can order and pay without waiting for a waiter.

Mr Quang has talked to a team of developers about his ideas for the system. Customers have to be able to see a photo of every dish and choose the size of their bowl. The screen should accept card and phone payments, but it does not need to accept cash. Each order has to be sent to the kitchen immediately.

The kitchen staff also want the system to show how long each order has been waiting. Mr Quang wants the screen to work in Vietnamese and English, because many tourists eat at the restaurant. He plans to install the screen before the Lunar New Year holiday, when the restaurant is busiest.

R26. At lunchtime, customers often wait ten minutes to order.

☐ True ☐ False

R27. The screen needs to accept cash.

☐ True ☐ False

R28. Each order has to be sent to the kitchen immediately.

☐ True ☐ False

R29. The kitchen staff want the system to show how long each order has been waiting.

☐ True ☐ False

R30. Mr Quang wants the screen to work only in Vietnamese.

☐ True ☐ False

Writing

2.5 points

Part A: Translation (W31–W35)

Translate these sentences into Vietnamese (Questions 31–35).

W31. Alpha testing is done by our own developers before the software is given to any customers.

W32. The client wants the app to send a reminder one hour before each appointment.

W33. Clicking the company logo makes the browser go back to the home page.

W34. The new version of our website is due to go live at the beginning of next month.

W35. All the photos on this website were taken by our own staff.

Part B: Instruction email

You are a team leader at a software company. Ravi, a new developer, starts work on the BookIt project tomorrow and needs to set up the project on his laptop. Write an email to Ravi explaining the steps, using the notes below. In your email you must use:
- at least two of should, have to and need to;
- at least one passive sentence (… is given…, … is shown…);
- be due to or be scheduled to at least once.
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- sign in to the company code library with your staff account
- download the BookIt project to your laptop
- install the tools / the list is given in the 'Read me' file
- run the app / check that the start screen appears
- if there is an error: a red message is shown / send a screenshot to the team leader
- team meeting: scheduled to start at 10 a.m. on Monday
- reminder: lock your laptop

Required language: Requirements: should, have to, need to (at least two); The passive (at least one): is given, is shown; Plans and schedules: be due to / be scheduled to + infinitive.

Write 80–100 words in the body: count from the greeting through the signature; exclude From / To / Date / Subject.

From: _____

To: Ravi

Date: _____

Subject: _____

Hi / Dear Ravi,

It should be quite easy to _____ .

First, _____ .

Then, _____ .

Next, _____ .

After that, _____ .

Finally, _____ .

Don't forget to _____ when you've finished.

Best wishes,

[Full name] _____

[Job title] _____

[Department] _____

Speaking

2.5 points

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. Think about a website that you use often. What should the people who run it change or add? Use should, have to, need to or want + object + to (I want the website to…).

2. Think about a machine at home, for example a washing machine or a microwave. Explain what happens when you press different buttons. Use make + object + verb (makes the door open) or cause + object + to + verb (causes the machine to stop).

3. What events does your class or your university have next month? Use plan to, be due to, be scheduled to or the present continuous for future arrangements.

Part 2 (S2)

Explain the project schedule. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

You are the project manager for a new mobile app for a travel agency. Explain the project schedule in the cues to the client. Use be scheduled to, be due to, plan to and the present continuous for future arrangements (We're meeting…).

- design: 3–21 March
- programming: 24 March – 30 April
- testing with ten travel agents: 2–16 May
- launch: 19 May
- next Tuesday: meeting with the client to show the first designs (arranged)

Required language: be scheduled to / be due to + infinitive: Programming is scheduled to start on 24 March; The app is due to be launched on 19 May.; plan to + infinitive: We plan to test the app with ten travel agents.; Present continuous for future arrangements: We're meeting you next Tuesday..

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

Yesterday your company's online shop stopped working from 8.15 a.m. to 9.15 a.m. during a big sale. Your manager asks you what happened. Use the cues to explain the problem and how it was fixed. Use cause + object + to + verb and make + object + verb, and at least two passive sentences (The server was restarted…, The bug was fixed…).

- 8 a.m.: the sale started / ten times more visitors than normal
- too many visitors → the server slowed down
- 8.15 a.m.: the shop stopped working / customers could not pay
- a bug in the payment page → the page reloaded again and again
- 9.15 a.m.: the server restarted by the IT team
- the bug fixed by the developers / an extra server added

Required language: cause + object + to-infinitive: The visitors caused the server to slow down.; make + object + bare infinitive: The bug made the page reload.; The passive (at least two sentences): The server was restarted at 9.15; The bug was fixed by the developers..
