Part A

Listen to the phone call and choose the best answer A, B, C or D (Questions L1–L5).

Nadia, who works in the marketing team, phones Ivan at IT support about the company's new web browser.

L1. Why is Nadia phoning IT support?

A. She is having problems with the new browser.
B. Her computer is not starting.
C. She cannot log in to the intranet.
D. She wants a new keyboard.

L2. What is wrong with the company news page?

A. It opens very slowly.
B. It is showing yesterday's news.
C. The pictures are missing.
D. It is in the wrong language.

L3. How can Nadia make the text bigger?

A. Click the refresh button
B. Change the home page
C. Hold Control and press the plus key
D. Restart the browser

L4. What does Nadia want the browser to show when it starts?

A. A search page
B. The company news page
C. Yesterday's news
D. The company intranet

L5. Where does Ivan tell Nadia to type the intranet address?

A. In the search box
B. In the On start-up section
C. In the address bar
D. In an email to IT support

Part B

Listen to the talk and answer the questions. Write NO MORE THAN THREE WORDS for each answer (Questions L6–L10).

Martin, a customer service manager, explains the company's email guidelines to new staff.

L6. What is the maximum number of words in a subject line?

Answer (maximum 3 words): _____

L7. Where can staff find the company signature?

Answer (maximum 3 words): _____

L8. What must staff use before they press Send?

Answer (maximum 3 words): _____

L9. How quickly does the company reply to customer emails?

Answer (maximum 3 words): _____

L10. What must staff never share by email?

Answer (maximum 3 words): _____

Reading

2.5 points · 30 questions

Part 1A: Matching (R1–R5)

Match the terms (1–5) with the correct definitions (A–F). There is one extra definition that you do not need (Questions 1–5).

A. A small device that plugs into a computer and works as an electronic key to unlock access to a piece of software.

B. A document or file that is sent with an email message.

C. Software that recognises letters and numbers written on paper, so that paper documents can be scanned into a computer.

D. A system that connects computers to each other over a large area, sometimes between countries.

E. A way of saving the address of a web page so that you can find it again.

F. A device that measures how quickly the speed of an object increases.

R1. Bookmark _____

R2. Attachment _____

R3. Dongle _____

R4. Accelerometer _____

R5. WAN _____

Part 1B: Grammar (R6–R12)

Choose the best answer, A, B, C or D.

R6. Please wait a few minutes. I _____ the new browser at the moment.

A. install
B. installs
C. am installing
D. installed

R7. I _____ what this error message means. Can you help me?

A. don't understand
B. doesn't understand
C. not understanding
D. am not understand

R8. The technician _____ looks after our servers is on holiday this week.

A. which
B. where
C. what
D. who

R9. A browser is a program _____ shows web pages on your screen.

A. who
B. which
C. where
D. whose

R10. If you click the refresh button, the page _____ any new information.

A. shows
B. showing
C. showed
D. is show

R11. If we buy tablets for the sales team, they _____ able to work on the train.

A. are being
B. were
C. will be
D. be

R12. My laptop battery lasts only _____ hour, so I always carry my charger.

A. a
B. an
C. the
D. any

Part 1C: Vocabulary (R13–R20)

Choose the best answer, A, B, C or D.

R13. Chrome and Firefox are examples of a web _____.

A. server
B. link
C. signature
D. browser

R14. Check the email address of the _____ before you click Send.

A. signature
B. back button
C. recipient
D. recharger

R15. A _____ uses shapes and lines to show the stages of a process.

A. flowchart
B. invoice
C. signature
D. server

R16. Click the _____ button to return to the page that you were looking at before.

A. refresh
B. back
C. delete
D. sign

R17. The delivery app uses _____ to show the driver's exact position.

A. LAN
B. CPU
C. USB
D. GPS

R18. This tablet has a long _____ life, so you can use it all day without charging it.

A. battery
B. service
C. network
D. signal

R19. A _____ network uses radio signals instead of cables.

A. wired
B. printed
C. wireless
D. proprietary

R20. Online banking websites _____ your card details so that nobody else can read them.

A. refresh
B. post
C. follow
D. encrypt

Part 2A: Reading comprehension (R21–R25)

Read the passage and choose the best answer A, B, C or D (Questions 21–25).

> **Tablets for Home-Care Nurses**
>
> Carewell is a home-care company in Leeds. Its thirty nurses visit elderly patients in their homes every day. Until last year, the nurses carried paper records for each patient. They wrote notes by hand and took the papers back to the office at the end of the day, where an assistant typed everything into the computer system. The nurses also had to phone the office if they needed information about a new patient. This took a lot of time, and sometimes the papers were lost.
>
> Now each nurse has a tablet with a special app. If a doctor changes a patient's medicine, the nurse sees the new information immediately, because the app updates the records over the mobile phone network. The tablets also have GPS, so the app shows each nurse the quickest route to the next patient.
>
> At the end of each visit, the patient or a family member signs the screen with a finger. The app then sends an electronic version of the visit report to the office. The assistant no longer needs to type anything and now spends most of the day organising the nurses' timetables.
>
> There is one problem. The tablets use a lot of power, and the battery life is only about six hours. If a nurse works a long shift, the tablet sometimes switches off before the last visit. The company is now putting a car charger in every nurse's car. Each charger costs about twenty pounds.

R21. What was one problem with the paper records?

- **A.** Patients could not read them.
- **B.** Sometimes the papers were lost.
- **C.** Doctors wrote on them.
- **D.** They were very expensive.

R22. How does GPS help the nurses?

- **A.** It shows the quickest route to the next patient.
- **B.** It updates the patients' medicine.
- **C.** It sends visit reports to the office.
- **D.** It makes the battery last longer.

R23. What happens at the end of each visit?

- **A.** The nurse phones the doctor.
- **B.** The assistant types the report.
- **C.** The patient or a relative signs the screen.
- **D.** The nurse prints a paper record.

R24. What does the office assistant mainly do now?

- **A.** Types the nurses' notes
- **B.** Visits elderly patients
- **C.** Repairs the tablets
- **D.** Organises the nurses' timetables

R25. What is the company doing about the battery problem?

- **A.** Buying new tablets with bigger batteries
- **B.** Putting a charger in every nurse's car
- **C.** Making the nurses' shifts shorter
- **D.** Switching off the GPS on the tablets

Part 2B: True / False (R26–R30)

Read the passage and write T (True) or F (False) (Questions 26–30).

> **The Network at Hillside College**
>
> Hillside College has about 1,200 students and 300 computers. The computers in the three computer labs are connected to the network with cables, because students often download large files and a wired connection is faster and more reliable.

> In the library and the cafeteria, students use the wi-fi, which is free for everyone who has a college account. Visitors can use a separate guest network, but it is slower, and it does not give access to the college server.
>
> The server, which is in a locked room next to the IT office, stores all the students' work, and it is backed up every night. Students who forget to save their work on the server can lose it, because the lab computers delete all local files when they restart.
>
> The network is managed by two technicians who work from Monday to Friday. At the weekend, there is no technical support, so the college asks students to report any problems by email. A technician reads these emails first thing on Monday morning.

R26. The computers in the labs use a wired connection.

☐ True ☐ False

R27. Students have to pay to use the wi-fi in the library.

☐ True ☐ False

R28. Visitors on the guest network can access the college server.

☐ True ☐ False

R29. The lab computers keep local files after they restart.

☐ True ☐ False

R30. Students should report problems by email at the weekend.

☐ True ☐ False

Writing

2.5 points

Part A: Translation (W31–W35)

Translate these sentences into Vietnamese (Questions 31–35).

W31. I usually check my emails in the morning, but today I am working at a customer's office.

W32. A server is a computer that provides services to the other computers on a network.

W33. If you use a VPN, your data will be more secure on public wi-fi networks.

W34. If the battery is low, the tablet switches off the screen automatically.

W35. The engineer who installed our network has written a short guide for new users.

Part B: Instruction email

You are an IT officer. The IT team is installing a new wireless network in the office. Sara, the office manager, has asked how to connect her laptop to it. Write an email to Sara explaining the steps, using the notes below. In your email you must use:
- the present continuous at least once for something that is happening now (The IT team is installing…);
- at least one relative clause with which, that or who;
- at least one zero or first conditional sentence (If + present simple, present simple / will + verb).
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- this week: the IT team / install a new wireless network
- click the Wi-Fi icon / choose Bridge-Staff (the network for staff)
- enter the password from reception
- open the browser / check that the company homepage loads
- staff who work from home: connect to the VPN (it encrypts company data)
- if the laptop can't connect: call the helpdesk on extension 210
- reminder: remove the old network from the laptop

Required language: Present continuous for things happening now (at least once): The IT team is installing…; Relative clauses (at least one): which, that, who; Zero conditional (If + present simple, present simple) or first conditional (If + present simple, will + verb), at least one; Articles a, an, the.

Write 80–100 words in the body: count from the greeting through the signature; exclude From / To / Date / Subject.

From: _____

To: Sara

Date: _____

Subject: _____

Hi / Dear Sara,

It should be quite easy to _____ .

First, _____ .

Then, _____ .

Next, _____ .

After that, _____ .

Finally, _____ .

Don't forget to _____ when you've finished.

Best wishes,

[Full name] _____

[Job title] _____

[Department] _____

Speaking

2.5 points

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. What do you usually do online in a normal week, and what are you doing differently this month? Use the present simple and the present continuous.

2. What happens if you click on a link in an email from someone you don't know? Use zero or first conditional sentences (If you…, … / If you…, … will…).

3. Describe a website or app that you use often. Use relative clauses with which, that or who (It's an app which…).

Part 2 (S2)

Explain network concepts. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

A new student at your college does not understand some network words. Explain what each word in the cues means and give an example from your college or home. Use relative clauses with which, that or who (A server is a computer which…).

- server
- wi-fi
- LAN
- VPN
- network technician

Required language: Relative clauses with which or that for things: A LAN is a network which…; Relative clauses with who or that for people: A network technician is a person who….

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

You work at a small hotel. Your manager is not sure whether to give the maintenance and cleaning staff smartphones with a work app. Explain the benefits and one possible problem. Use first conditional sentences (If we give…, staff will…) and at least one zero conditional sentence (If a room is…, the app…).

- the app shows which rooms need cleaning / no need to phone reception
- staff take a photo of a broken item / maintenance team sees it immediately
- guests report problems / faster repairs
- possible problem: phones get lost or broken / buy strong cases

Required language: First conditional: If + present simple, will + verb; Zero conditional: If + present simple, present simple.
