Part A

Listen to the conversation and choose the best answer A, B, C or D (Questions L1–L5).

Sofia, an IT manager, has just come back from a conference. She asks Ben, her assistant, what happened while she was away.

L1. When did Ben deploy the update to the accounting software?

A. On Monday morning
B. On Wednesday evening
C. On Friday evening
D. On Thursday afternoon

L2. Why didn't one laptop get the update?

A. It was switched off.
B. The sales manager took it home.
C. Its hard drive was full.
D. It was in the server room.

L3. What can the interns do with the files in the finance folder?

A. Change and delete them
B. Open them but not change them
C. Copy them to a memory stick
D. Send them to the director

L4. What happened while Ben was updating the antivirus software?

A. The email server was very slow.
B. The update deleted some emails.
C. He got an alert about many login attempts.
D. An intern opened the director's account.

L5. What does Sofia ask Ben to do?

A. Call the security company
B. Send her a copy of the alert
C. Block the director's account
D. Install the update again

Part B

Listen to the talk and answer the questions. Write NO MORE THAN THREE WORDS for each answer (Questions L6–L10).

Helen, the database administrator at a dental clinic, explains the patient database to new receptionists.

L6. How many tables does the database have?

Answer (maximum 3 words): _____

L7. Which field is the primary key in the Patients table?

Answer (maximum 3 words): _____

L8. What should receptionists use to add new patients?

Answer (maximum 3 words): _____

L9. When should receptionists print the list of tomorrow's appointments?

Answer (maximum 3 words): _____

L10. Which report prints the list of tomorrow's appointments?

Answer (maximum 3 words): _____

Reading

2.5 points · 30 questions

Part 1A: Matching (R1–R5)

Match the terms (1–5) with the correct definitions (A–F). There is one extra definition that you do not need (Questions 1–5).

A. To ask a question about the data stored in a computer system, in order to retrieve some information.

B. To take (a number or an amount) from a larger number or amount.

C. A device that allows you to draw on its surface, using a stylus rather than a mouse, with the results appearing on your computer screen.

D. An occasion when a computer or a computer system suddenly stops working.

E. The art of combining pictures, words and decoration in the production of books, magazines, etc.

F. A thing shaped like a pen, used for writing on a special computer screen.

R1. Crash _____

R2. Stylus _____

R3. Query the database _____

R4. Subtract _____

R5. Graphics tablet _____

Part 1B: Grammar (R6–R12)

Choose the best answer, A, B, C or D.

R6. Did you _____ the sales figures in the spreadsheet and _____ any errors?

A. check / found
B. checked / find
C. check / find
D. checked / found

R7. Before _____ the keyboard, always switch off and unplug the computer.

A. clean
B. cleaned
C. to clean
D. cleaning

R8. After _____ the server room, always lock the door.

A. leave
B. leaving
C. left
D. to leave

R9. _____ a report in the database, you can see last month's total sales.

A. By running
B. By run
C. For run
D. With runs

R10. By _____ a filter on the Date column, you can see only this month's orders.

A. use
B. used
C. to use
D. using

R11. The technician found an error in the network settings and _____ it straight away.

A. correct
B. corrects
C. corrected
D. correcting

R12. While the technicians _____ the network drives, the power suddenly went off.

A. were checking
B. was checking
C. check
D. are checking

Part 1C: Vocabulary (R13–R20)

Choose the best answer, A, B, C or D.

R13. In a spreadsheet, a horizontal line of cells that goes across the page is called a _____.

A. column
B. cell
C. formula
D. row

R14. In a database table, a _____ is a single field that uniquely identifies each record, such as a staff ID number.

A. report
B. primary key
C. table
D. form

R15. Which database object is used as an interface for users to enter data into tables easily?

A. Record
B. Report
C. Form
D. Field

R16. When an IT administrator decides who can open or change specific files and folders on a server, they are setting _____.

A. permissions
B. updates
C. logs
D. backups

R17. A systems administrator reads the _____ to see a record of events on the server, for example who logged in and when.

A. drivers
B. updates
C. logs
D. apps

R18. A _____ is a collection of hard drives in a single box accessed through a network, providing flexible storage for all connected computers.

A. multifunction printer
B. NAS device
C. touch screen
D. projector

R19. Which part of a laptop do you slide your finger across to move the cursor instead of using a mouse?

A. Touchpad
B. Headset
C. Projector
D. Webcam

R20. When paper gets stuck inside a printer and stops it from printing, this common problem is called a paper _____.

A. freeze
B. dropout
C. lock
D. jam

Part 2A: Reading comprehension (R21–R25)

Read the passage and choose the best answer A, B, C or D (Questions 21–25).

> **A Better Way to Count the Bread**
>
> Last year, Maria Lopez ran a small bakery with two shops in the same town. Every evening, she wrote the day's sales in a notebook and added up the numbers with a calculator. The work took about an hour, and she often made mistakes when she was tired.
>
> In January, her nephew Daniel, an IT student, offered to help. He designed a spreadsheet with one worksheet for each shop. In each worksheet, column A showed the products, column B showed the price and column C showed the number of items sold. Then he typed a formula into column D that multiplied the price by the number of items. At the bottom of column D, a SUM function added all the values together and showed the total for the day.
>
> At first, Maria did not trust the spreadsheet. For two weeks, she checked every total with her calculator. She found only one problem: Daniel chose the wrong cells in one formula, so the total for the second shop did not include the cakes. He corrected it the same day, and after that the totals were always right.
>
> Now Maria saves almost an hour every evening. By comparing the two worksheets, she can also see which products sell better in each shop. Last month, she stopped making brown bread for the second shop because very few customers bought it there. She used the extra time and money to try new kinds of cakes.

R21. What was Maria's problem before January?

A. Her calculator often broke.
B. She often made mistakes in her sums.
C. Her shops closed too early.
D. Her nephew lost her notebook.

R22. What did the formula in column D do?

A. It added the prices of all the products.
B. It divided the total by the two shops.
C. It multiplied the price by the items sold.
D. It showed the name of each product.

R23. Why did Maria check every total with her calculator for two weeks?

A. The spreadsheet was too slow.
B. She did not trust the spreadsheet at first.
C. Daniel asked her to test his formulae.
D. The prices changed every day.

R24. What was wrong with one of Daniel's formulae?

A. It used the wrong cells.
B. It had a spelling mistake.
C. It used the wrong worksheet.
D. It counted the cakes twice.

R25. What did Maria do after comparing the two worksheets?

A. She closed the second shop.
B. She bought a new calculator.
C. She started selling cakes online.
D. She stopped making brown bread for one shop.

Part 2B: True / False (R26–R30)

Read the passage and write T (True) or F (False) (Questions 26–30).

> **Problems in the Training Room**
>
> Last Tuesday was a difficult day in the training room at Fenwick Insurance. At nine o'clock in the morning, Tom Hale, a trainer, was setting up the projector for a course on the new booking system

when the screen suddenly went blue. While he was checking the settings, a technician arrived. She found that the projector was working correctly, but someone had connected it with the wrong cable. She replaced it, and the course started fifteen minutes late.

In the afternoon, the trainees were taking part in an online meeting with the head office. While they were listening to the finance director, the sound in two headsets stopped. The technician discovered that the headsets were plugged into a broken USB hub. She connected them straight to the computers, and the sound came back after a few minutes.

After the course, Tom wrote a short report for the IT department. He asked them to put labels on all the projector cables and to test the headsets every Monday morning, before the first course of the week.

R26. The problem with the projector happened in the morning.

☐ True ☐ False

R27. The technician found that the projector was broken.

☐ True ☐ False

R28. The course started on time.

☐ True ☐ False

R29. The trainees were listening to the finance director when the sound stopped.

☐ True ☐ False

R30. Tom asked the IT department to test the headsets every Monday.

☐ True ☐ False

Writing

2.5 points

Part A: Translation (W31–W35)

Translate these sentences into Vietnamese (Questions 31–35).

W31. Nero Burning ROM is a professional software solution for burning audio, data, and image files onto optical discs.

W32. When I typed the date into this spreadsheet cell, it came out as a number instead of a proper date format.

W33. Each record in a client database is like a row on a spreadsheet, while each field functions like an individual cell.

W34. While the systems administrator was checking the server logs for system errors, the main network drive crashed.

W35. Before reinstalling the operating system or replacing the hard drive, make sure to back up all important data to an external NAS device.

Part B: Instruction email

Write an email to your user called Peter to instruct him about how to prepare his system before a major software upgrade and resolve an account login issue. Use the notes below. In your email you must use:
- before or after + -ing at least twice to show the order of the steps (Before deploying…, After setting…);
- by + -ing at least once to explain how to do something (You can … by selecting…).
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- back up database files / transfer them to NAS device
- check system logs / verify network connections
- deploy major software upgrade / restart computer
- open login page / select "Reset Password" if account is locked
- set new password / log in to confirm new credentials work

Required language: Before / after + -ing (at least twice) to show the order of tasks: Before deploying the upgrade, …; After setting a new password, …; Imperatives with sequence words (first, then, next, after that, finally); By + -ing (at least once) to explain how to do something: by selecting "Reset Password".

Write 80–100 words in the body: count from the greeting through the signature; exclude From / To / Date / Subject.

From: _____

To: Peter

Date: _____

Subject: _____

Hi / Dear Peter,

It should be quite easy to _____ .

First, _____ .

Then, _____ .

Next, _____ .

After that, _____ .

Finally, _____ .

Don't forget to _____ when you've finished.

Best wishes,

[Full name] _____

[Job title] _____

[Department] _____

Speaking

2.5 points

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. What did you use a computer or smartphone for yesterday? Describe two or three things you did. Use the past simple.

2. What do you do before and after installing a new app on your phone or computer? Use before + -ing and after + -ing (Before installing…, After installing…).

3. How do you usually find an old file, photo or message quickly on your computer or phone? Answer with by + -ing (by typing…, by searching…).

Part 2 (S2)

Explain the sequence of tasks to a colleague. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

A new IT assistant starts work tomorrow. Explain the steps for setting up a computer for a new employee. Use before, while and after to show the order of the tasks.

- check the employee's job and department
- create a user account on the server
- install the standard software / download the latest updates
- set permissions for the shared folders
- ask the employee to log in and check that everything works

Required language: Before + -ing / before + clause: Before creating the account, …; While + clause: While the software is installing, …; After + -ing / after + clause: After installing the updates, ….

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

You are an IT assistant. Your manager was away yesterday and asks you what happened. Use the cues to explain how the problem occurred and what you did to solve it. Use the past continuous for the action in progress and the past simple for what happened (… was …ing when …; While I was …ing, …).

- 10.15 a.m.: the sales team / give an online presentation to a client
- the internet connection / drop three times
- you / check the router → find a damaged network cable
- while you / replace the cable → the sales manager / phone the client
- after replacing the cable → test the connection / everything / work

Required language: Past continuous for the longer action in progress: The sales team was giving a presentation…; Past simple for the shorter action and finished actions: …when the connection dropped.; When + past simple, while + past continuous.
