Part A

Listen to the interview and choose the best answer A, B, C or D (Questions L1–L5).

Owen, a systems analyst, asks Clara, the manager of a gym, about the booking app she wants.

L1. Why does Clara want a booking app?

A. The reception phone is always busy.
B. Reception closes very early.
C. Members want to pay online.
D. Some instructors are leaving.

L2. What do members need to log in?

A. An email address and a password
B. A membership number and a password
C. A phone number only
D. A name and a date of birth

L3. What should the app do if a class is full?

A. Cancel the class
B. Ask the member to pay more
C. Put the member on a waiting list
D. Tell reception to phone the member

L4. Why doesn't the app need to take payments?

A. All the classes are free.
B. Members pay every month at reception.
C. The bank does not allow it.
D. Instructors collect the money.

L5. When will Owen send the specification?

A. Today
B. On Monday
C. Next week
D. On Friday

Part B

Listen to the presentation and answer the questions. Write NO MORE THAN THREE WORDS for each answer (Questions L6–L10).

Priya, a web designer, presents the structure of a new museum website.

L6. How many main sections are linked to the home page?

Answer (maximum 3 words): _____

L7. Which section is used most?

Answer (maximum 3 words): _____

L8. Who is the Learning section designed for?

Answer (maximum 3 words): _____

L9. How quickly are messages from the Contact page answered?

Answer (maximum 3 words): _____

L10. When will the new site be launched?

Answer (maximum 3 words): _____

2.5 points · 30 questions

Part 1A: Matching (R1–R5)

Match the terms (1–5) with the correct definitions (A–F). There is one extra definition that you do not need (Questions 1–5).

A. To remove the mistakes from a computer program.

B. Website information of very high quality that you often need to pay to access.

C. A type of bar chart that shows when things are going to happen in a project.

D. The process of improving the position of a website in the results of a search engine.

E. A quantity in a program that can represent several different amounts.

F. A process of testing software in which customers use it, so that any problems will be found.

R1. Gantt chart _____

R2. Beta testing _____

R3. Debug _____

R4. Variable _____

R5. SEO _____

Part 1B: Grammar (R6–R12)

Choose the best answer, A, B, C or D.

R6. The manager wants the developers _____ the app by Friday.

A. finish
B. to finish
C. finishing
D. finished

R7. Users _____ to log in before they can see their orders.

A. should
B. must
C. need
D. can

R8. The website _____ by thousands of people every day.

A. visits
B. visit
C. is visiting
D. is visited

R9. The new company logo _____ last week by our design team.

A. was designed
B. designed
C. is designing
D. has design

R10. Clicking this button makes the video _____ again from the beginning.

A. to start
B. starting
C. start
D. started

R11. A missing bracket in the code can cause the program _____.

A. crash
B. crashing
C. crashed
D. to crash

R12. We're due _____ the app to the client at the end of the month.

A. to deliver
B. delivering
C. deliver
D. for delivering

Part 1C: Vocabulary (R13–R20)

Choose the best answer, A, B, C or D.

R13. According to the project _____, the design stage finishes in May.

A. schedule
B. feedback
C. content
D. value

R14. Our teacher gave us some useful _____ on our project presentation.

A. purchase
B. feedback
C. combination
D. robot

R15. The client has to _____ the design before the programmers start work.

A. calculate
B. interview
C. navigate
D. approve

R16. The _____ is the first page that visitors see when they open a website.

A. pop-up menu
B. line of code
C. home page
D. navigation chart

R17. Before you contact customer support, read the _____ page, where you can find answers to common questions.

A. challenge
B. FAQs
C. schedule
D. specification

R18. This program has more than 50,000 _____ of code.

A. lines
B. values
C. robots
D. details

R19. _____ testing is the first stage of testing, when the company that is writing the software checks it before anyone outside the company uses it.

A. Wireless
B. Final
C. Alpha
D. Public

R20. The _____ describes exactly what the new software should do.

A. challenge
B. specification
C. robot
D. combination

Part 2A: Reading comprehension (R21–R25)

Read the passage and choose the best answer A, B, C or D (Questions 21–25).

> **The Harbour Ferries App**
>
> Harbour Ferries runs boats between four islands. At the moment, passengers buy paper tickets at the port, and there are often long queues in summer. Last autumn, to reduce the queues, the company asked a small software firm, Bytecraft, to develop a mobile app for buying and showing tickets.
>
> The project began in January. Bytecraft has five people working on it: a project manager, three programmers and a designer. The requirements were approved by the ferry company in February, and the programmers started writing the code in March. The most difficult part is the payment system, which has to work even when passengers have a weak phone signal at sea.
>
> The programmers are finishing the last features this month. The app is due to be ready at the end of May, and it is scheduled to go live on 1 June, just before the busy summer season. The ferry company plans to put large posters at every port so that passengers know about the app. The posters are due to arrive in the middle of May.
>
> There is one risk. The ferry company also wants the app to show live boat times, but this feature was added to the plan late, in April. The project manager thinks that it may not be ready by June, so the team is planning to release it in July instead. Paper tickets are going to stay available for passengers without smartphones.

R21. Why did Harbour Ferries ask Bytecraft to develop an app?

A. To advertise the islands
B. To sell more boats
C. To train its staff
D. To reduce the queues for tickets

R22. When were the requirements approved?

A. In February
B. In January
C. In March
D. In April

R23. Why is the payment system the most difficult part?

A. Many passengers do not have smartphones.
B. The client changed it in April.
C. It must work with a weak phone signal.
D. It has to print paper tickets.

R24. When is the app scheduled to go live?

A. At the end of May
B. In July
C. In April
D. On 1 June

R25. What does the team plan to do with the live boat times feature?

A. Remove it from the app
B. Release it in July
C. Release it on 1 June
D. Add it to the paper tickets

Part 2B: True / False (R26–R30)

Read the passage and write T (True) or F (False) (Questions 26–30).

> **A Program for a Smart Greenhouse**
>
> A small farm near York uses a computer program to control its greenhouse. The program was written by a local student, and it reads information from three sensors every five minutes: one for temperature, one for light and one for the soil.

> During the day, if the temperature goes above 28 degrees, the program makes the roof windows open. When the temperature falls below 18 degrees, it closes the windows and makes the heater switch on. Dry soil causes the water pump to start, and the pump runs for exactly two minutes each time.
>
> At night, the program does not open the windows, even if the greenhouse is warm, because the farmer worries about animals getting inside. Every morning at seven o'clock, a short report is sent to the farmer's phone.
>
> Last summer, a broken sensor caused the pump to run all day, and many plants were damaged. Since then, the program has had a new safety rule: the pump is never allowed to run more than ten times in one day.

R26. The greenhouse program was written by a local student.

☐ True ☐ False

R27. During the day, a temperature above 28 degrees makes the roof windows open.

☐ True ☐ False

R28. The program opens the windows at night if the greenhouse is warm.

☐ True ☐ False

R29. The broken sensor last summer did not damage any plants.

☐ True ☐ False

R30. The pump is now allowed to run a maximum of ten times a day.

☐ True ☐ False

Writing

2.5 points

Part A: Translation (W31–W35)

Translate these sentences into Vietnamese (Questions 31–35).

W31. The client wants us to add an online payment system to the website.

W32. All customer data is stored on a secure server in Frankfurt.

W33. Pressing the red button makes the robot stop immediately.

W34. We are due to finish the testing stage at the end of next month.

W35. Users should be able to change their password without contacting the help desk.

Part B: Instruction email

You are a project manager at a software company. The new food delivery app is almost finished, and Leo, a junior tester in your team, is going to test it this week. Write an email to Leo explaining how to test the app, using the notes below. In your email you must use:
- at least two of should, have to and need to;
- at least one passive sentence (… is saved…, … should be reported…);
- be due to or be scheduled to at least once.
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- log in with the test account / the password is in the project folder
- place three test orders / check that each order is saved
- check the app on Android and iOS phones
- check that the restaurant receives a message for each order
- report every problem in the tracker with a screenshot
- testing: due to finish on Thursday / app: scheduled to be released next Monday
- reminder: log out of the test account

Required language: Requirements (at least two): should, have to, need to; The passive (at least one): is saved, should be reported, can be found; Schedules (at least one): be due to, be scheduled to.

Write 80–100 words in the body: count from the greeting through the signature; exclude From / To / Date / Subject.

From: _____

To: Leo

Date: _____

Subject: _____

Hi / Dear Leo,

It should be quite easy to _____ .

First, _____ .

Then, _____ .

Next, _____ .

After that, _____ .

Finally, _____ .

Don't forget to _____ when you've finished.

Best wishes,

[Full name] _____

[Job title] _____

[Department] _____

Speaking

2.5 points

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. What features should a good app for students have? Use should, have to, need to or want + object + to (I want the app to…).

2. Describe a famous website or app. Use at least two passive sentences (It is used by…, It was created in…, It can be downloaded…).

3. What are you planning to do in your studies next week or next month? Use plan to, be due to, be scheduled to or the present continuous for future plans.

Part 2 (S2)

Explain how a program works. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

You wrote a simple car racing game for a programming class. Explain to your classmates what happens in the game when players do different things. Use make + object + verb (makes the car move) and cause + object + to + verb (causes the game to end).

- press the left or right arrow key → the car moves left or right
- hit a wall → the game ends
- collect a coin → the score goes up by ten points
- the score reaches 100 → the next level starts
- press the space bar → the game stops for a short time

Required language: make + object + bare infinitive: Pressing the arrow key makes the car move.; cause + object + to-infinitive: Hitting a wall causes the game to end..

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

Your company is moving its servers to a new server room next week. Your manager asks you about the plan. Use the cues to explain what is going to happen each day. Use plan to, be due to, be scheduled to and the present continuous for future arrangements.

- Monday: the new server racks / due to arrive
- Tuesday: the electrician / install extra power sockets (arranged)
- Wednesday night: the team / scheduled to move the servers
- Thursday: you / plan to test the network and all the services
- Friday: staff / return to normal work

Required language: be due to + infinitive: The racks are due to arrive on Monday.; be scheduled to + infinitive: We're scheduled to move the servers on Wednesday night.; plan to + infinitive: I plan to test the network on Thursday.; Present continuous for future arrangements: The electrician is coming on Tuesday..
