Speaking

2.5 points

Các bài mẫu là gợi ý tham khảo, không phải đáp án đúng duy nhất. Part 1 có câu hỏi mở và không có bài mẫu trong bộ dữ liệu.

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. What have you already done this week for your studies, and what haven't you done yet? Use the present perfect with already and yet.

2. A friend's phone battery runs out very quickly. What advice can you give? Use should, try + -ing or If…, you should….

3. What do you hope to do in the next five years? Use plan to, intend to, hope to or expect to.

Part 2 (S2)

Speculate about the cause of a problem. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

You are helping a colleague in a meeting room. The projector shows no picture from the laptop. Look at the facts in the cues and explain what might, could, must or can't be the cause. Then say what your colleague should try. Use may, might, could, must and can't.

- the projector's power light is on
- the projector screen says 'No signal'
- the laptop screen works normally
- the video cable is connected only at the laptop end
- another laptop worked with this projector this morning

Required language: Speculation: may, might, could (possible); must (almost certain); can't (impossible); Suggestions: should; try + -ing.

Sample response

> Let's think about this. The power light on the projector is on, so it can't be a problem with the electricity. Another laptop worked with this projector this morning, so the projector can't be broken. The screen says 'No signal', which means the projector isn't receiving anything from your laptop. Look at the video cable: it's only connected at the laptop end. That must be the reason. Someone may have moved the cable after the last meeting. If it still doesn't work after we connect it, the problem might be the laptop's display settings, or it could be that the laptop isn't sending a picture to a second screen. In that case, you should try pressing the function key with the screen symbol.

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

You are at an interview for a junior IT support job. The interviewer asks you to talk about your experience and your plans. Use the present perfect for your experience (I have worked…, I have already…) and plan to, hope to, intend to or expect to for your plans.

- your studies: subject / when you expect to graduate
- experience: part-time help desk job at university / what you have done there
- skills you have already learned
- plans: what you hope to do in this job / a course you intend to take
- in five years: what you plan to do

Required language: Present perfect for experience: I have worked…, I have already learned…; Future plans: plan to, hope to, intend to, expect to + verb.

Sample response

> Thank you for inviting me. I'm studying information technology, and I expect to graduate next June. For the last two years, I have worked part-time at the university help desk. I have answered hundreds of calls from students and teachers, and I have set up laptops for new staff. I have already learned how to install operating systems and how to solve common network problems. I have also improved my communication skills, because many users are not very technical. In this job, I hope to learn more about servers and security. I intend to take a networking course next year. In five years, I plan to work as a network engineer, maybe in a large international company.
