Part A

Listen to the phone call and choose the best answer A, B, C or D (Questions L1–L5).

Chloe phones Marcus at Apex PCs, a computer shop, to order a new computer.

L1. Why does Chloe want a new computer?

A. Her old computer is broken.
B. Her old computer is too slow for 4K video.
C. She wants to play computer games.
D. She is starting a new company.

L2. How fast is the processor that Marcus recommends?

A. 2.4 GHz
B. 4.12 GHz
C. 4.2 GHz
D. 12 GHz

L3. How much memory does Chloe decide to have?

A. 64 GB
B. 16 GB
C. 32 GB
D. 128 GB

L4. Why does Marcus suggest an external drive for Chloe's old projects?

A. It is faster than an internal drive.
B. It is easier to carry to work.
C. The new computer has no space for a drive.
D. It is cheaper than putting everything inside the computer.

L5. How much will the computer cost without the external drive?

A. £3,250
B. £2,350
C. £2,530
D. £2,305

Part B

Listen to the video tutorial and answer the questions. Write NO MORE THAN THREE WORDS for each answer (Questions L6–L10).

Ben explains three ways to take a screenshot on a Windows laptop.

L6. Where is the Print Screen key on most keyboards?

Answer (maximum 3 words): _____

L7. Which keys do you press to paste the picture into a document?

Answer (maximum 3 words): _____

L8. What colour does the screen go after you press Windows, Shift and S?

Answer (maximum 3 words): _____

L9. What is the name of the folder inside Pictures where screenshots are saved automatically?

Answer (maximum 3 words): _____

L10. How long is the delay that Ben suggests in the Snipping Tool?

Answer (maximum 3 words): _____

Reading

2.5 points · 30 questions

Part 1A: Matching (R1–R5)

Match the terms (1–5) with the correct definitions (A–F). There is one extra definition that you do not need (Questions 1–5).

A. A computer disk that contains electronic parts, such as silicon chips, rather than moving mechanical parts.

B. The place on a piece of electrical equipment that you put a plug into.

C. A system that records your username and password and gives you access to a computer, your email, etc.

D. To move words, pictures, etc. on a computer screen by pulling them along with the mouse.

E. A type of cable used when a computer is connected to other computer networks.

F. A small sign or picture on a computer screen that is used to start a particular operation.

R1. Icon _____

R2. Solid state drive _____

R3. User account _____

R4. Drag _____

R5. Ethernet cable _____

Part 1B: Grammar (R6–R12)

Choose the best answer, A, B, C or D.

R6. A millisecond is one _____ of a second.

A. millionth
B. hundredth
C. thousandth
D. billionth

R7. The company sold 2,500,000 laptops last year. How do we say '2,500,000'?

A. two millions five hundred thousands
B. two million five hundred thousand
C. two million five hundreds thousand
D. two point five hundred thousand

R8. Could you _____ the printer on, please? I need to print a report.

A. switching
B. to switch
C. switched
D. switch

R9. Take the DVD _____ the drive and put it back in its case.

A. out of
B. into
C. on
D. at

R10. Which sentence is correct?

A. Connect printer the to the laptop.
B. Connect the printer the laptop to.
C. Connect the printer to the laptop.
D. To the laptop connect printer the.

R11. The video won't play _____ the file is damaged.

A. so that
B. because of
C. to
D. because

R12. Double click the title bar _____ the window.

A. maximise
B. to maximise
C. for maximise
D. so that maximise

Part 1C: Vocabulary (R13–R20)

Choose the best answer, A, B, C or D.

R13. _____ on the file and choose 'Rename' from the menu that appears.

A. Right-click
B. Maximise
C. Unplug
D. Resize

R14. Give the document a clear _____, such as 'Sales_May', so that you can find it easily later.

A. menu
B. socket
C. tab
D. filename

R15. To print the document, choose 'Print' from the File _____.

A. speaker
B. socket
C. filename
D. menu

R16. If a program stops responding, _____ the computer.

A. resize
B. partition
C. restart
D. select

R17. Type your question in the search box and _____ the Enter key.

A. press
B. slide
C. resize
D. unplug

R18. This game has amazing 3-D _____: the cars and buildings look almost real.

A. audio
B. sockets
C. graphics
D. headphones

R19. You need to wear special _____ over your eyes to see the virtual reality world.

A. headphones
B. speakers
C. projectors
D. goggles

R20. Setting up a new email account is a short _____: it has three steps and takes about five minutes.

A. socket
B. process
C. printer
D. graphics

Part 2A: Reading comprehension (R21–R25)

Read the passage and choose the best answer A, B, C or D (Questions 21–25).

> **Hillside School Moves to Open Source**
>
> Last year, Hillside School in Leeds had a problem. Its 300 student laptops were six years old, and the proprietary operating system on them was going to stop receiving security updates. New laptops for every student would cost about £150,000, and the school could not afford that.
>
> The school's IT manager, Ravi Patel, suggested a different solution. Instead of buying new machines, the school installed a free open source operating system on the old laptops. Because the open source system needs less memory, the laptops ran faster than before. The school only had to buy extra 4 GB memory modules for 120 of the laptops, so that they could run video software. Each module cost £15.
>
> Ravi and two technicians did the work during the summer holiday. First, they backed up the students' files to the school server. Then they installed the new system on each laptop from a USB stick. Each installation took about twenty-five minutes, and the whole project took three weeks.
>
> Not everyone was happy at first. Some teachers had to learn new programs, and the school's exam software only works on the old proprietary system, so the school kept ten laptops with the old system for exams. But after six months, most students and teachers say that the laptops work better than before. The school saved more than £140,000, and it now plans to use some of the money to build a new media room.

R21. Why did Hillside School need to make a change?

A. Many of its laptops were stolen.

B. The old operating system was going to stop receiving security updates.

C. The students wanted tablets instead of laptops.

D. The school server was too slow.

R22. Why did the laptops run faster after the change?

A. The school put new processors in them.

B. Students used them less often.

C. The open source system needs less memory.

D. The school bought new hard drives.

R23. Why did the school buy memory modules for 120 laptops?

A. So that they could run video software

B. To install the new operating system

C. Because the old modules were broken

D. For the students' exams

R24. How long did each installation take?

A. Three weeks

B. About two hours

C. Six months

D. About twenty-five minutes

R25. Why did the school keep ten laptops with the old system?

A. Because the exam software only works on the old system

B. For teachers who did not want to learn new programs

C. For the new media room

D. Because those laptops were newer

Part 2B: True / False (R26–R30)

Read the passage and write T (True) or F (False) (Questions 26–30).

> **Headphones: Which Type Is Right for You?**
>
> Wired headphones plug into the headphone socket of your phone or computer. They are usually cheaper than wireless ones, and you never have to charge them. However, many new phones do not have a headphone socket, so you may need an adapter.
>
> Wireless headphones connect to your device by Bluetooth. They are more comfortable for sport because there are no wires. Most models play music for 20 to 30 hours before you need to charge them. The sound quality is good, but professional sound engineers still prefer wired headphones because there is no delay.
>
> Noise-cancelling headphones are useful on trains and planes. They have small microphones that listen to the noise around you and cancel it. They cost more than normal headphones, and the noise-cancelling function uses extra battery power.
>
> If you work in an open-plan office, choose headphones with a built-in microphone, so that you can join online meetings without a separate headset. Before you buy, always try the headphones on in the shop, because comfort matters as much as sound.

R26. Wired headphones are usually cheaper than wireless headphones.

☐ True ☐ False

R27. All new phones have a headphone socket.

☐ True ☐ False

R28. Most wireless headphones play music for 20 to 30 hours before they need charging.

☐ True ☐ False

R29. Professional sound engineers prefer wireless headphones.

☐ True ☐ False

R30. The noise-cancelling function does not use any extra battery power.

☐ True ☐ False

Writing

2.5 points

Part A: Translation (W31–W35)

Translate these sentences into Vietnamese (Questions 31–35).

W31. The server has two 3.4 GHz processors and 256 GB of memory.

W32. First, select the text, and then click the 'Bold' button on the toolbar.

W33. Plug the speakers into the audio socket on the back of the computer.

W34. We use a projector in the classroom so that all the students can see the slides clearly.

W35. Open source software is usually free, and users can see and change the program code.

Part B: Instruction email

You are an IT support technician. Marco, a sales assistant, needs to install the company's new sales software on his laptop. Write an email to Marco explaining the steps, using the notes below. In your email you must use:
- imperatives with sequence words;
- at least one softener (could you…?, just);
- at least one sentence with two objects (insert … into …, take … out of …);
- at least one reason or purpose (to…, so that…, because…).
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- save your work / close all programs (so that you don't lose anything)
- insert the installation USB stick into a USB port
- double click on 'setup' / accept the licence terms
- enter the product key from the box / click 'Install'
- restart the laptop to complete the installation
- reminder: take the USB stick out of the laptop / return it to the IT office when you've finished

Required language: Imperatives with sequence words: First, … Then, … Next, … After that, … Finally, …; Softeners: just, could you…?; Sentences with two objects: insert the USB stick into a USB port, take the USB stick out of the laptop; Reason and purpose: to + verb, so that + clause.

Write 80–100 words in the body: count from the greeting through the signature; exclude From / To / Date / Subject.

From: _____

To: Marco

Date: _____

Subject: _____

Hi / Dear Marco,

It should be quite easy to _____ .

First, _____ .

Then, _____ .

Next, _____ .

After that, _____ .

Finally, _____ .

Don't forget to _____ when you've finished.

Best wishes,

[Full name] _____

[Job title] _____

[Department] _____

Speaking

2.5 points

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. How fast is the internet connection at your home, and how big are the files you usually download? Say the numbers and units clearly, for example fifty megabits per second or two point five gigabytes.

2. Why do many people keep their photos and documents in cloud storage? Give two or three reasons using because, for, to or so that.

3. How do you copy photos from your phone to a computer? Use sentences with two objects (connect … to …, plug … into …, copy … onto …).

Part 2 (S2)

Give instructions for using a computer. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

A classmate wants to share a file with you from their online storage, for example Google Drive, but does not know how. Explain the steps. Use imperatives, sequence words (first, then, next, after that, finally) and at least one softener (could you…?, just).

- open the online storage website / log in
- find the file / right-click on it
- select 'Share'
- type the other person's email address
- choose 'Viewer' or 'Editor'
- click 'Send'

Required language: Imperatives with sequence words: First, … Then, … Next, … After that, … Finally, …; Softeners: could you…?, just.

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

Your manager wants to use the office's old desktop computers for two more years. Explain to her which parts you want to add or change, how you will connect or install each one and why it is needed. Use sentences with two objects (put … into …, connect … to …, plug … into …) and reason or purpose (to…, so that…, because…, for…).

- 8 GB more memory: put the module into the empty DIMM slot / so that staff can open several programs
- a solid state drive instead of the old hard disk / because it starts programs much faster
- a second monitor: connect it to the video socket / for working with two documents
- a webcam: plug it into a USB port / to join video meetings with clients

Required language: Sentences with two objects: put … into …, connect … to …, plug … into …; Reason and purpose: to + verb, so that + clause, because + clause, for + noun / -ing.
