Part A

Listen to the conversation and choose the best answer A, B, C or D (Questions L1–L5).

At a technology fair, Mai, who works in the IT office of a language school, talks to Daniel, a salesperson at a projector company.

L1. Why does Mai talk to Daniel?

A. To complain about her old projectors
B. To get information about projectors
C. To sell English courses to his company
D. To ask him to repair a projector

L2. How much does one Lumo 500 cost?

A. £420
B. £560
C. £1,960
D. £2,240

L3. What can only the Lumo 500 do?

A. Connect to laptops wirelessly
B. Play sound through speakers
C. Work with a remote control
D. Show three-dimensional images

L4. Why doesn't Mai buy four Lumo 500s?

A. They would cost more than her budget.
B. They are too heavy for the classrooms.
C. They are not bright enough for her rooms.
D. The delivery would take too long.

L5. What does Mai decide to order?

A. Four Lumo 500s
B. Four Lumo 300s
C. Two of each model
D. One of each model

Part B

Listen to the talk and answer the questions. Write NO MORE THAN THREE WORDS for each answer (Questions L6–L10).

Paul, the practice manager of Harbour Dental Clinic, tells the staff about the clinic's IT costs this year.

L6. How many new desktop computers did the clinic buy?

Answer (maximum 3 words): _____

L7. What was the most expensive single item?

Answer (maximum 3 words): _____

L8. How much does the booking software cost each month?

Answer (maximum 3 words): _____

L9. What did a local company install for the clinic?

Answer (maximum 3 words): _____

L10. What does Paul recommend replacing next year?

Answer (maximum 3 words): _____

2.5 points · 30 questions

Part 1A: Matching (R1–R5)

Match the terms (1–5) with the correct definitions (A–F). There is one extra definition that you do not need (Questions 1–5).

A. The ability or power that makes a machine or a person able to do something difficult.

B. A short time during which you use something to find out whether it is good enough for your needs.

C. A book or document that explains how to use a product.

D. A way of charging for something that follows methods which have been used for a long time.

E. A building that houses computer systems and related equipment, such as storage systems.

F. A display that lets users see and change the basic settings of a system.

R1. Data centre _____

R2. Trial period _____

R3. Control panel _____

R4. Capability _____

R5. Traditional pricing _____

Part 1B: Grammar (R6–R12)

Choose the best answer, A, B, C or D.

R6. Router X sends data at 300 Mbps, and Router Y sends data at 600 Mbps. Router Y is _____ than Router X.

A. fastest
B. more fast
C. faster
D. the fastest

R7. Both monitors cost £180, so the Asta monitor is _____ expensive as the Brio monitor.

A. more
B. as
C. than
D. most

R8. Of all the printers in the catalogue, the K20 has _____ running costs.

A. lowest
B. the lower
C. more low
D. the lowest

R9. Last year, the school _____ £3,000 on new keyboards and mice.

A. spent
B. cost
C. came
D. charged

R10. Could you tell me how long _____?

A. does the battery last
B. the battery lasts
C. lasts the battery
D. the battery last

R11. Can you tell me _____ the price includes delivery or not?

A. what
B. that
C. whether
D. which

R12. I recommend _____ the new software on one computer before we install it everywhere.

A. testing
B. to test
C. test
D. tested

Part 1C: Vocabulary (R13–R20)

Choose the best answer, A, B, C or D.

R13. My phone battery is almost empty. Have you got a _____ I can borrow?

A. reader
B. charger
C. holder
D. tier

R14. It is only a _____ problem with the display settings, so it won't take long to fix.

A. major
B. dedicated
C. unlimited
D. minor

R15. Before we choose a supplier, we need to _____ the prices and features of each product carefully.

A. charge
B. spend
C. analyse
D. host

R16. If you have a question about the app, you can ask other users on the online _____.

A. forum
B. tier
C. fee
D. plan

R17. The _____ of a presentation is the final part, where the speaker summarises the main points.

A. introduction
B. body
C. title
D. conclusion

R18. This plan includes _____ storage, so you can upload as many files as you like.

A. minor
B. unlimited
C. major
D. basic

R19. The keyboard, mouse and cables come as a _____, so you don't need to buy them separately.

A. tier
B. forum
C. set
D. plan

R20. The company offers a cleaning _____ for laptops: a technician visits the office once a month.

A. service
B. accessory
C. charger
D. reader

Part 2A: Reading comprehension (R21–R25)

Read the passage and choose the best answer A, B, C or D (Questions 21–25).

> **A New Till for Rosa's Café**
>
> Rosa owns a small café in Bristol with two members of staff. Her old cash register is slow, and it cannot print receipts for card payments. She wants a point-of-sale (POS) system that runs on a tablet. Her nephew Leo, who is studying IT at university, offers to help her research two products.
>
> The first system, SwiftTill, comes with a tablet, a card machine and a receipt printer for £650. The software costs £25 a month and sends Rosa a sales report every evening. However, support is by email only, and the company usually replies within 24 hours.
>
> The second system, CafeDesk, is cheaper to buy, because the hardware costs only £480. On the other hand, its software is more expensive at £40 a month. It includes telephone support seven days a week and a stock feature that tells Rosa when she is running out of milk or coffee beans. Leo phones CafeDesk and asks whether the system works without the internet. The salesperson explains that it saves sales on the tablet and sends them to the cloud later. SwiftTill does not have this feature.
>
> Leo works out the costs for the first year. SwiftTill comes to £950, and CafeDesk comes to £960, so the difference is very small. The café's internet connection often goes down at weekends, when the café is busiest. For this reason, Leo recommends CafeDesk. Rosa agrees with him and plans to order it next week.

R21. Why does Rosa want a new system?

A. Her staff cannot use the old tablet.
B. Her old cash register is slow.
C. She wants to sell coffee online.
D. Her nephew asked her to change it.

R22. What is true about SwiftTill?

A. Its hardware is cheaper than CafeDesk's.
B. It offers telephone support every day.
C. Its support is by email only.
D. It tells Rosa when stock is low.

R23. What did Leo want to find out when he phoned CafeDesk?

A. Whether the system works without the internet
B. How much the hardware costs
C. When the system can be delivered
D. Whether the staff need any training

R24. How do the first-year costs of the two systems compare?

A. CafeDesk costs £10 more than SwiftTill.
B. SwiftTill costs £10 more than CafeDesk.
C. The two systems cost exactly the same.
D. CafeDesk costs half as much as SwiftTill.

R25. Why does Leo recommend CafeDesk?

A. It costs less in the first year.
B. It sends a sales report every evening.
C. The café's internet often goes down at weekends.
D. Rosa's staff have used it before.

Part 2B: True / False (R26–R30)

Read the passage and write T (True) or F (False) (Questions 26–30).

> **Old Computers at Greenway Library**
>
> Greenway Library has twelve public computers, and they are now six years old. Visitors often complain that the machines are slow, especially when several people print at the same time. Hassan, the library's IT technician, has looked at two options.
>
> The first option is to upgrade the old computers with more memory and faster hard drives. This costs £120 per computer. The machines would be faster after the upgrade, but they would not be as fast as new ones. The second option is to buy new compact desktops at £480 each. They are smaller than the old towers, and they use less electricity than them.
>
> Hassan recommends buying eight new computers for the main hall now. He thinks it is best to upgrade the four computers in the children's area, because children use them only for homework and simple games. Before he wrote his report, he asked the city council whether it could pay half of the cost. The council agreed, so the library will order the new computers next month.

R26. The library's public computers are six years old.

☐ True ☐ False

R27. Upgrading one old computer costs more than buying one new desktop.

☐ True ☐ False

R28. After the upgrade, the old computers would be as fast as new ones.

☐ True ☐ False

R29. The new desktops use less electricity than the old computers.

☐ True ☐ False

R30. The city council refused to pay any of the cost.

☐ True ☐ False

Writing

2.5 points

Part A: Translation (W31–W35)

Translate these sentences into Vietnamese (Questions 31–35).

W31. The new scanner was more expensive than the old one, but it is much faster.

W32. Could you tell me whether the price includes installation and training?

W33. Our IT costs came to £15,000 last year, and we spent most of the money on new laptops.

W34. The trial period lasts thirty days, so we can try out the software before we pay for it.

W35. I think it's best to choose the plan with unlimited bandwidth because our website is growing quickly.

Part B: Instruction email

You are an IT assistant. Tom, a new office assistant, needs to order toner cartridges for the office printers from the OfficeSupply website. Write an email to Tom explaining the steps, using the notes below. In your email you must use:
- at least one comparative or superlative (more pages than, cheaper than, the cheapest);
- the verbs cost or come to to talk about the price;
- at least one recommendation (I recommend…, I think it's best to…);
- at least one indirect question (Could you ask … whether…?, Do you know if…?).
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- log in to the OfficeSupply website / open 'Printer supplies'
- compare the standard and XL cartridges: the XL prints more pages
- add 6 XL cartridges to the basket / £45 each (total £270)
- choose delivery / recommend free standard delivery (the cheapest option)
- pay with the company card / check the confirmation email
- ask the supplier whether they recycle old cartridges
- reminder: log out

Required language: Comparatives and superlatives (at least one): more pages than, cheaper than, the cheapest; Talking about money: cost, come to; Recommendations (at least one): I recommend + -ing / noun phrase; I think it's best to…; Indirect questions (at least one): Could you ask … whether…?, Do you know if…?.

Write 80–100 words in the body: count from the greeting through the signature; exclude From / To / Date / Subject.

From: _____

To: Tom

Date: _____

Subject: _____

Hi / Dear Tom,

It should be quite easy to _____ .

First, _____ .

Then, _____ .

Next, _____ .

After that, _____ .

Finally, _____ .

Don't forget to _____ when you've finished.

Best wishes,

[Full name] _____

[Job title] _____

[Department] _____

Speaking

2.5 points

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. Which app on your phone is the most useful for you? Compare it with another app that you use. Use comparatives and superlatives (more useful than, the most…, as … as).

2. What is the most expensive piece of technology that you or your family have bought? How much did it cost, and what else did you pay for with it? Use cost, pay, spend or come to.

3. Your university wants to buy new software for students. What would you recommend? Use at least one recommendation structure (I think we should…, I recommend…, it's best to…).

Part 2 (S2)

Explain what you need to find out and ask the questions. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

Your manager wants to buy a 3-D printer for the design team. You are going to phone the supplier. First, explain briefly what information the team needs. Then say the questions you will ask the supplier, using the cues. Use at least four polite indirect questions (Could you tell me…?, Do you know whether/if…?, Can you tell me…?).

- the price of the printer and the delivery charge
- the cost of the plastic for printing (per kilo)
- the largest model size it can print
- training for the design team
- how long the guarantee lasts

Required language: Indirect questions (at least four) with statement word order: Could you tell me how much it costs?; Do you know whether/if the price includes delivery?; Can you tell me how long the guarantee lasts?.

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

Your company has eight salespeople, and they need new mobile phone contracts. Your manager asks you to compare two offers and recommend one. Compare the offers with comparatives and superlatives, say what each offer would cost for the whole team with cost or come to, and give your recommendation with at least two recommendation structures (I recommend…, I think we should…, it's best to…).

- Offer A: £18 per phone a month / 10 GB of data / no calls abroad
- Offer B: £25 per phone a month / unlimited data / cheap calls in Europe
- the sales team visits customers in Europe every month
- monthly budget for the team: £220

Required language: Comparatives and superlatives: cheaper than, more data than, the most expensive; Talking about money: Offer A costs…; for eight phones it comes to…; Recommendations: I recommend + -ing / that we + verb; I think we should…; it's best to….
