PRACTICE TEST FOR INFORMATION TECHNOLOGY — UNIT 7: Development | TEST A

Đề AI Time allowed: 90 minutes

ANSWER KEY & REFERENCE RESPONSES

Listening: answers and transcripts

Part A

Owen, a systems analyst, asks Clara, the manager of a gym, about the booking app she wants.

L1. Why does Clara want a booking app?

Answer: A — The reception phone is always busy.

Giải thích: Clara nói hiện giờ hội viên phải gọi lễ tân "and the phone is always busy".

L2. What do members need to log in?

Answer: B — A membership number and a password

Giải thích: "they have to log in with their membership number and a password".

L3. What should the app do if a class is full?

Answer: C — Put the member on a waiting list

Giải thích: "The app should put the member on a waiting list."

L4. Why doesn't the app need to take payments?

Answer: B — Members pay every month at reception.

Giải thích: "Members pay every month at reception, so the app doesn't need to take payments."

L5. When will Owen send the specification?

Answer: D — On Friday

Giải thích: "I'll write the specification and send it to you on Friday."

Listening transcript — Part A

Owen: Thanks for meeting me, Clara. I'd like to ask some questions about the booking app you want for the gym.

Clara: Of course.

Owen: First, what should members be able to do with the app?

Clara: Mainly book classes. At the moment, people have to phone reception, and the phone is always busy. We want members to book a place in a class in just a few seconds.

Owen: Do members need to log in?

Clara: Yes, they have to log in with their membership number and a password. We don't want visitors to book classes.

Owen: OK. What happens if a class is full?

Clara: The app should put the member on a waiting list. And if someone cancels, the next person on the list should get a message.

Owen: That's clear. Do you need any payment features?

Clara: No. Members pay every month at reception, so the app doesn't need to take payments. But I'd like it to show the class timetable for the whole week.

Owen: Fine. Anything else?

Clara: Yes. Our instructors want the app to tell them how many people are coming to each class.

Owen: Great. I'll write the specification and send it to you on Friday.

Part B

Priya, a web designer, presents the structure of a new museum website.

L6. How many main sections are linked to the home page?

Answer: five / 5 / five sections / five main sections / 5 sections

Giải thích: "the home page, which is linked to five main sections".

L7. Which section is used most?

Answer: visit / the visit section / visit section

Giải thích: "The Visit section is used most, so it is placed first in the menu."

L8. Who is the Learning section designed for?

Answer: teachers / for teachers

Giải thích: "The Learning section is designed for teachers."

L9. How quickly are messages from the Contact page answered?

Answer: within two days / two days / 2 days / within 2 days

Giải thích: "all messages are answered within two days".

L10. When will the new site be launched?

Answer: september / in september

Giải thích: "The new site will be launched in September."

Listening transcript — Part B

Priya: Good afternoon. Today I'm going to show you the structure of the new website for the City Science Museum. Everything starts from the home page, which is linked to five main sections: Visit, Exhibitions, Learning, Shop and Contact.

Priya: The Visit section is used most, so it is placed first in the menu. Opening times and ticket prices are shown on this page, and tickets can be bought online. In the Exhibitions section, each exhibition is given its own page with photos and a short video. Past exhibitions are kept in an archive, so they can still be seen after they close.

Priya: The Learning section is designed for teachers. Lesson plans can be downloaded there for free. The Contact page includes a map and a form, and all messages are answered within two days.

Priya: Finally, every page is tested on phones and tablets, because about seventy percent of visitors use mobile devices. The new site will be launched in September. Thank you.

Reading: answers and explanations

Matching (R1–R5)

R1. Gantt chart

Answer: C — A type of bar chart that shows when things are going to happen in a project.

Giải thích: Gantt chart (biểu đồ Gantt) là biểu đồ thanh cho thấy khi nào các việc trong dự án diễn ra.

R2. Beta testing

Answer: F — A process of testing software in which customers use it, so that any problems will be found.

Giải thích: Beta testing (kiểm thử beta) là đưa phần mềm cho khách hàng dùng thử để tìm ra lỗi.

R3. Debug

Answer: A — To remove the mistakes from a computer program.

Giải thích: Debug (gỡ lỗi) là loại bỏ lỗi khỏi chương trình máy tính.

R4. Variable

Answer: E — A quantity in a program that can represent several different amounts.

Giải thích: Variable (biến) là đại lượng có thể mang nhiều giá trị khác nhau.

R5. SEO

Answer: D — The process of improving the position of a website in the results of a search engine.

Giải thích: SEO (Search Engine Optimisation, tối ưu hoá công cụ tìm kiếm) là cải thiện thứ hạng của trang web trong kết quả tìm kiếm. Định nghĩa B là của premium content (nội dung trả phí), không có trong danh sách thuật ngữ.

Grammar (R6–R12)

R6. The manager wants the developers _____ the app by Friday.

Answer: B — to finish

Giải thích: Cấu trúc want + tân ngữ + to-infinitive: "wants the developers to finish".

R7. Users _____ to log in before they can see their orders.

Answer: C — need

Giải thích: Chỗ trống đứng trước "to log in" nên chỉ "need (to)" đúng. "should", "must", "can" là động từ khuyết thiếu, đi thẳng với động từ nguyên mẫu, không có "to".

R8. The website _____ by thousands of people every day.

Answer: D — is visited

Giải thích: Câu bị động (có "by thousands of people"): be + quá khứ phân từ: "is visited".

R9. The new company logo _____ last week by our design team.

Answer: A — was designed

Giải thích: Bị động thì quá khứ đơn (last week, by our design team): was + quá khứ phân từ: "was designed".

R10. Clicking this button makes the video _____ again from the beginning.

Answer: C — start

Giải thích: make + tân ngữ + động từ nguyên mẫu không "to": "makes the video start".

R11. A missing bracket in the code can cause the program _____.

Answer: D — to crash

Giải thích: cause + tân ngữ + to-infinitive: "cause the program to crash".

R12. We're due _____ the app to the client at the end of the month.

Answer: A — to deliver

Giải thích: be due + to-infinitive để nói về lịch trình: "We're due to deliver".

Vocabulary (R13–R20)

R13. According to the project _____, the design stage finishes in May.

Answer: A — schedule

Giải thích: Schedule (lịch trình) là kế hoạch cho biết việc gì sẽ diễn ra và khi nào.

R14. Our teacher gave us some useful _____ on our project presentation.

Answer: B — feedback

Giải thích: Feedback (nhận xét, phản hồi) là lời khuyên, góp ý về mức độ thành công của một việc.

R15. The client has to _____ the design before the programmers start work.

Answer: D — approve

Giải thích: Approve (phê duyệt) là chính thức chấp nhận một kế hoạch, bản thiết kế.

R16. The _____ is the first page that visitors see when they open a website.

Answer: C — home page

Giải thích: Home page (trang chủ) là trang đầu tiên của trang web, thường có liên kết tới các trang khác.

R17. Before you contact customer support, read the _____ page, where you can find answers to common questions.

Answer: B — FAQs

Giải thích: FAQs (Frequently Asked Questions) là trang các câu hỏi thường gặp kèm câu trả lời.

R18. This program has more than 50,000 _____ of code.

Answer: A — lines

Giải thích: Line of code (dòng mã) là một dòng lệnh trong chương trình.

R19. _____ testing is the first stage of testing, when the company that is writing the software checks it before anyone outside the company uses it.

Answer: C — Alpha

Giải thích: Alpha testing (kiểm thử alpha) là giai đoạn kiểm thử đầu tiên, do chính công ty viết phần mềm thực hiện trước khi người ngoài công ty dùng. "Final" mâu thuẫn với "first stage"; "Public" mâu thuẫn với "before anyone outside the company".

R20. The _____ describes exactly what the new software should do.

Answer: B — specification

Giải thích: Specification (bản đặc tả) là mô tả chi tiết phần mềm phải làm gì.

Reading comprehension (R21–R25)

R21. Why did Harbour Ferries ask Bytecraft to develop an app?

Answer: D — To reduce the queues for tickets

Giải thích: Đoạn 1: "to reduce the queues, the company asked a small software firm, Bytecraft, to develop a mobile app". Quảng cáo các đảo không được nhắc đến.

R22. When were the requirements approved?

Answer: A — In February

Giải thích: Đoạn 2: "The requirements were approved by the ferry company in February".

R23. Why is the payment system the most difficult part?

Answer: C — It must work with a weak phone signal.

Giải thích: Đoạn 2: hệ thống thanh toán "has to work even when passengers have a weak phone signal at sea".

R24. When is the app scheduled to go live?

Answer: D — On 1 June

Giải thích: Đoạn 3: "it is scheduled to go live on 1 June". Cuối tháng Năm là lúc ứng dụng dự kiến làm xong.

R25. What does the team plan to do with the live boat times feature?

Answer: B — Release it in July

Giải thích: Đoạn 4: "the team is planning to release it in July instead".

True / False (R26–R30)

R26. The greenhouse program was written by a local student.

Answer: T — True

Giải thích: Đoạn 1: "The program was written by a local student".

R27. During the day, a temperature above 28 degrees makes the roof windows open.

Answer: T — True

Giải thích: Đoạn 2: "During the day, if the temperature goes above 28 degrees, the program makes the roof windows open." Ban đêm thì khác (xem R28).

R28. The program opens the windows at night if the greenhouse is warm.

Answer: F — False

Giải thích: Đoạn 3: "At night, the program does not open the windows, even if the greenhouse is warm".

R29. The broken sensor last summer did not damage any plants.

Answer: F — False

Giải thích: Đoạn 4: cảm biến hỏng làm máy bơm chạy cả ngày "and many plants were damaged".

R30. The pump is now allowed to run a maximum of ten times a day.

Answer: T — True

Giải thích: Đoạn 4: quy tắc mới "the pump is never allowed to run more than ten times in one day".

Bản dịch và email dưới đây là mẫu tham khảo. Các cách diễn đạt khác đúng ý và đúng yêu cầu vẫn được chấp nhận.

Translation (W31–W35)

W31. The client wants us to add an online payment system to the website.

Bản dịch tham khảo: Khách hàng muốn chúng tôi thêm hệ thống thanh toán trực tuyến vào trang web.

W32. All customer data is stored on a secure server in Frankfurt.

Bản dịch tham khảo: Toàn bộ dữ liệu khách hàng được lưu trữ trên một máy chủ bảo mật ở Frankfurt.

W33. Pressing the red button makes the robot stop immediately.

Bản dịch tham khảo: Nhấn nút màu đỏ sẽ làm rô-bốt dừng lại ngay lập tức.

W34. We are due to finish the testing stage at the end of next month.

Bản dịch tham khảo: Theo kế hoạch, chúng tôi sẽ hoàn thành giai đoạn kiểm thử vào cuối tháng sau.

W35. Users should be able to change their password without contacting the help desk.

Bản dịch tham khảo: Người dùng nên có thể tự đổi mật khẩu mà không cần liên hệ bộ phận hỗ trợ.

Instruction email to Leo

You are a project manager at a software company. The new food delivery app is almost finished, and Leo, a junior tester in your team, is going to test it this week. Write an email to Leo explaining how to test the app, using the notes below. In your email you must use:
- at least two of should, have to and need to;
- at least one passive sentence (… is saved…, … should be reported…);
- be due to or be scheduled to at least once.
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- log in with the test account / the password is in the project folder
- place three test orders / check that each order is saved
- check the app on Android and iOS phones
- check that the restaurant receives a message for each order
- report every problem in the tracker with a screenshot
- testing: due to finish on Thursday / app: scheduled to be released next Monday
- reminder: log out of the test account

Model email

> From: Bui Thanh Tung
> To: Leo
> Date: 25th November
> Subject: Testing the food delivery app
>
> Hi Leo,
>
> It should be quite easy to test the new app.
> First, log in with the test account. The password can be found in the project folder.
> Then, place three test orders and check that each order is saved.
> Next, you need to check it on Android and iOS phones.
> After that, check that the restaurant gets each order.
> Finally, every problem should be reported in the tracker.
> Testing is due to finish on Thursday.
> Don't forget to log out of the test account when you've finished.
>
> Best wishes,
> Bui Thanh Tung
> Project Manager
> Software Development Department

Speaking

2.5 points

Các bài mẫu là gợi ý tham khảo, không phải đáp án đúng duy nhất. Part 1 có câu hỏi mở và không có bài mẫu trong bộ dữ liệu.

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. What features should a good app for students have? Use should, have to, need to or want + object + to (I want the app to…).

2. Describe a famous website or app. Use at least two passive sentences (It is used by…, It was created in…, It can be downloaded…).

3. What are you planning to do in your studies next week or next month? Use plan to, be due to, be scheduled to or the present continuous for future plans.

Part 2 (S2)

Explain how a program works. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

You wrote a simple car racing game for a programming class. Explain to your classmates what happens in the game when players do different things. Use make + object + verb (makes the car move) and cause + object + to + verb (causes the game to end).

- press the left or right arrow key → the car moves left or right
- hit a wall → the game ends
- collect a coin → the score goes up by ten points
- the score reaches 100 → the next level starts
- press the space bar → the game stops for a short time

Required language: make + object + bare infinitive: Pressing the arrow key makes the car move.; cause + object + to-infinitive: Hitting a wall causes the game to end..

Sample response

> Let me explain how my game works. The player controls a small red car. Pressing the left arrow key makes the car move to the left, and the right arrow key makes it move to the right. The player has to avoid the walls, because hitting a wall causes the game to end immediately. There are gold coins on the road. Collecting a coin makes the score go up by ten points. When the score reaches one hundred, this causes the next level to start, and the car goes faster. If the player needs a break, pressing the space bar makes the game stop for a short time. Pressing it again makes the game continue. I want to add music to the game next week.

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

Your company is moving its servers to a new server room next week. Your manager asks you about the plan. Use the cues to explain what is going to happen each day. Use plan to, be due to, be scheduled to and the present continuous for future arrangements.

- Monday: the new server racks / due to arrive
- Tuesday: the electrician / install extra power sockets (arranged)
- Wednesday night: the team / scheduled to move the servers
- Thursday: you / plan to test the network and all the services
- Friday: staff / return to normal work

Required language: be due to + infinitive: The racks are due to arrive on Monday.; be scheduled to + infinitive: We're scheduled to move the servers on Wednesday night.; plan to + infinitive: I plan to test the network on Thursday.; Present continuous for future arrangements: The electrician is coming on Tuesday..

Sample response

> Here's the plan for next week. On Monday, the new server racks are due to arrive in the morning, and we'll put them in the new room straight away. On Tuesday, the electrician is coming to install some extra power sockets, because the new room doesn't have enough. The most important day is Wednesday. The team is scheduled to move the servers on Wednesday night, after everyone has gone home, so that nobody loses any work. On Thursday, I plan to test the network and all our services, for example email and the file server. If everything works, staff are returning to normal work on Friday. I'm sending you a full timetable this afternoon.
