Lucy: Right, Sam. The Hanoi Technology Fair starts on the twelfth of May, so we need to plan our stand. Shall we start with the equipment?

Sam: OK. How about bringing two large screens? We could show our new fitness app on them.

Lucy: Good idea. And what about giving away free USB sticks?

Sam: I'm afraid that's quite expensive. Last year we gave away five hundred, and most visitors threw them away.

Lucy: Fair point. Maybe we could give away pens and stickers instead. They're much cheaper.

Sam: Yes, I agree. Now, who's going to work on the stand?

Lucy: I'd like three people there every day. Perhaps you could come on the first day? Visitors often ask technical questions.

Sam: I'm afraid I can't. I've got a client meeting in Da Nang on the twelfth. But I can come on the second and third days.

Lucy: That's fine. What about asking Mai to work on the first day? She knows the app really well.

Sam: Great idea. Shall I send her an email this afternoon?

Lucy: Yes, please. And could you prepare a short demonstration of the app? About five minutes long.

Listening transcript — Part B

Omar: Good morning, everyone, and welcome to the helpdesk team at Riverside College. I'm Omar, the helpdesk supervisor. Let me tell you about a normal week here.

Omar: We open at eight o'clock, but you should arrive ten minutes early. Every morning, the first job is to read the overnight log. It shows any problems with the college systems since the evening before.

Omar: We spend most of the day answering calls and messages from teachers and students. On a busy day, we get about two hundred calls. Students often forget their passwords, so password resets are our most common job.

Omar: On Tuesdays and Thursdays, two of you work in the library, because students usually need help with printing there. Once a fortnight, we have a team meeting on Friday afternoon to talk about difficult problems. You hardly ever need to work late, but during exam weeks the helpdesk stays open until nine in the evening.

Omar: Finally, one important rule: you must never ask a user for their password. If you need to log in to someone's account, ask me first. Right, any questions?

Speaking

2.5 points

Các bài mẫu là gợi ý tham khảo, không phải đáp án đúng duy nhất. Part 1 có câu hỏi mở và không có bài mẫu trong bộ dữ liệu.

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. How often do you check your email or messages, and when do you usually do it? Use adverbs of frequency and time expressions (always, usually, every morning, twice a day).

2. Imagine a support technician visits your class to talk about their job. Ask them three questions about their work. Use present simple questions (Do you…? How often do you…? What do you…?).

3. The computer lab at your university is always full before exams. Make two suggestions to solve the problem. Use Shall we…?, How about / What about + -ing? or We could….

Part 2 (S2)

Describe an IT company. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

You work for an IT company (real or imagined). A group of students is visiting your company. Explain what your company does, who its clients are, what products or services it provides and how often it does important things. Use the present simple (We provide…, Our clients are…, It sells…) and adverbs of frequency or time expressions (usually, always, twice a year).

- type of company: software developer / service provider / manufacturer
- products or services
- clients
- where the company works and how many employees it has
- how often it does important things (new versions, training, meetings)

Required language: Present simple for company activities: We provide…, It sells…, Our clients are…; Adverbs of frequency and time expressions: usually, always, often, twice a year, every month.

Sample response

> Welcome to Blue River Software. We are a software developer in Ho Chi Minh City, and we have about sixty employees. We make apps for restaurants and coffee shops. Our main product is an ordering app: customers scan a code on the table and order their food on their phone. Our clients are usually small restaurants, but we also work with two big coffee chains. We provide training for our clients' staff, and we always answer support calls within one hour. We release a new version of the app twice a year, normally in March and September. Every month, the developers meet the sales team to talk about what clients want. We hardly ever sell hardware, but we sometimes recommend suitable tablets to our clients.

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

You are a senior technician. A new colleague is going to start work in your company's server room tomorrow. Tell them the rules of the server room using the cues. Use must, mustn't, have to, don't have to, can't and should, and at least two imperatives (Keep…, Don't…).

- sign in at the door every time you enter (must / have to)
- no food or drink (mustn't / can't)
- a uniform is not necessary (don't have to)
- visitors only with the manager's permission (can't)
- report any warning lights to the supervisor immediately (should)
- keep the door closed / don't touch the cables without permission (imperatives)

Required language: Rules: must, mustn't, have to, don't have to, can't, should; Imperatives: Keep…, Don't….

Sample response

> Welcome to the team. Before you start tomorrow, I want to tell you the rules of the server room. First, you must sign in at the door every time you enter, even if you only stay for two minutes. You mustn't bring any food or drink into the room, because a cup of coffee can destroy a server. You don't have to wear a uniform, but you should wear comfortable shoes. You can't bring visitors into the room without the manager's permission. If you see a warning light on any machine, you should report it to the supervisor immediately. And two more things: keep the door closed at all times, because the room needs to stay cool, and don't touch any cables without permission. If you have any questions, just ask me.
