Part A

Listen to the phone call and choose the best answer A, B, C or D (Questions L1–L5).

Amira, who works in the accounts department, phones Leo at the IT helpdesk about a problem with a printer.

L1. Which machine has a problem?

A. The printer on the third floor
B. Amira's laptop
C. The multifunction printer on the second floor
D. The scanner in the IT office

L2. What was Amira doing when the machine stopped?

A. Scanning some invoices
B. Printing a fifty-page report
C. Opening the front cover
D. Phoning the helpdesk

L3. What does Amira think went into the machine?

A. A paper clip
B. A pen
C. A coin
D. A staple

L4. Why does Leo tell Amira not to remove the staple herself?

A. The machine is still switched on.
B. She could damage the glass.
C. She needs special gloves.
D. Only the manufacturer can open the cover.

L5. When will Leo come to look at the machine?

A. Immediately
B. Tomorrow morning
C. After lunch, at about two o'clock
D. At about twelve o'clock

Part B

Listen to the training session and answer the questions. Write NO MORE THAN THREE WORDS for each answer (Questions L6–L10).

Paul, an IT trainer, explains the formulae in his department's budget spreadsheet to a group of trainees.

L6. Which cell contains the SUM function for column B?

Answer (maximum 3 words): _____

L7. What does every formula start with?

Answer (maximum 3 words): _____

L8. What colour does a cell in column D turn if the result is negative?

Answer (maximum 3 words): _____

L9. What did someone type into cell D5 by mistake?

Answer (maximum 3 words): _____

L10. What did Paul send to the whole team yesterday?

Answer (maximum 3 words): _____

Reading

2.5 points · 30 questions

Part 1A: Matching (R1–R5)

Match the terms (1–5) with the correct definitions (A–F). There is one extra definition that you do not need (Questions 1–5).

A. To get back a piece of information that has been stored in the memory of a computer.

B. To do a calculation in which you add a number to itself a particular number of times.

C. A set of headphones, often with a microphone attached.

D. A single page or tab within a spreadsheet document.

E. To calculate how many times one number contains a smaller number.

F. If data has this, you are only allowed to read it, not to change it.

R1. Worksheet _____

R2. Retrieve a record _____

R3. Headset _____

R4. Read-only access _____

R5. Divide _____

Part 1B: Grammar (R6–R12)

Choose the best answer, A, B, C or D.

R6. The backup _____ last night because the server was offline.

A. didn't ran
B. didn't run
C. not ran
D. doesn't run

R7. Yesterday the technician _____ a new hard drive for the server.

A. choosed
B. chosen
C. chose
D. choose

R8. You can print address labels for all our customers _____ the Labels report.

A. by run
B. for running
C. with run
D. by running

R9. _____ the update, Anna restarted all the computers in the office.

A. After installing
B. After install
C. After installed
D. After to install

R10. Kevin found the error _____ the log files.

A. while check
B. while checking
C. while checked
D. while to check

R11. I _____ a presentation yesterday when the projector suddenly switched off.

A. was giving
B. am giving
C. were giving
D. give

R12. We were testing the new software when the network suddenly _____ down.

A. go
B. goes
C. going
D. went

Part 1C: Vocabulary (R13–R20)

Choose the best answer, A, B, C or D.

R13. The Staff table has a _____ called 'Phone number' for each employee.

A. bracket
B. field
C. sum
D. log

R14. The _____ of 25, 30 and 45 is 100.

A. row
B. sum
C. bracket
D. column

R15. In the formula =(A1+B1)*2, the spreadsheet adds A1 and B1 first because they are in _____.

A. logs
B. tables
C. brackets
D. fields

R16. Ten _____ three is seven.

A. plus
B. times
C. over
D. minus

R17. Our new _____ printer can print, scan, copy and send faxes.

A. multifunction
B. input
C. horizontal
D. unique

R18. After three wrong passwords, the system _____ the user out of their account for thirty minutes.

A. locks
B. resets
C. deploys
D. checks

R19. The email server crashed this morning, but it's up and _____ again now.

A. going
B. moving
C. running
D. starting

R20. Each customer has a _____ ID number, so no two customers have the same number.

A. vertical
B. unique
C. horizontal
D. external

Part 2A: Reading comprehension (R21–R25)

Read the passage and choose the best answer A, B, C or D (Questions 21–25).

> **The Weekend Server Move**
>
> Last month, Greenfield Accountants moved its data from an old server in the office to a new one in a data centre. The IT administrator, Raj Mehta, planned the move carefully, because the company's thirty accountants could not work without their files.
>
> Before starting, Raj sent an email to all staff and asked them to save their work and log out by six o'clock on Friday. After checking that everyone was logged out, he made two full backups of the old server: one on a NAS device and one on an external drive, which he took home.
>
> On Saturday morning, he started copying the data to the new server. The copying took nine hours, much longer than he expected, because the office internet connection was slow. While he was waiting, he tested the email system and updated the antivirus software on every desktop computer.
>
> On Sunday, Raj checked that all the folders were on the new server and set the permissions again. He then asked two managers to log in from home and open some files. Everything worked except one shared folder, which the managers could not open. Raj found that he had forgotten to give their group permission for it, and he corrected the mistake in five minutes.
>
> On Monday, staff noticed only one change: large files opened much faster. Raj kept the old server for another month before he switched it off, just in case.

R21. Why did Raj plan the move carefully?

A. The accountants could not work without their files.
B. The data centre was very far away.
C. He had never moved a server before.
D. The new server was very expensive.

R22. What did Raj do after checking that everyone was logged out?

A. He sent an email to all staff.
B. He made two full backups of the old server.
C. He tested the email system.
D. He switched off the old server.

R23. Why did the copying take nine hours?

A. The new server was too slow.
B. Some files were damaged.
C. The office internet connection was slow.
D. Raj made the backups at the same time.

R24. What problem did Raj find on Sunday?

A. The new server crashed.
B. The email system did not work.
C. One of the backups was missing.
D. The managers could not open one shared folder.

R25. What did Raj do with the old server?

A. He kept it for another month before switching it off.
B. He switched it off on Monday morning.
C. He took it home.
D. He moved it to the data centre.

Part 2B: True / False (R26–R30)

Read the passage and write T (True) or F (False) (Questions 26–30).

> **How City Library Uses Its Database**
>
> City Library has more than 40,000 books, and the staff manage all of them with a database. It stores information about books, members and loans. Every book has its own barcode, which is the primary key for the books.
>
> When a member borrows a book, the librarian scans the member's card and then the book's barcode. The database adds a new line to the Loans table and calculates the return date automatically: three weeks after the day of the loan. Each member can borrow up to six books at a time.
>
> Every morning, a librarian runs a report that lists all the books which are more than one week late. The library then sends a reminder by email to each member on the list.
>
> Members can also use the database themselves. By logging in to the library website, they can see which books they have at home and renew a book for another three weeks. A member who has three late books cannot borrow any more until they return them.

R26. The library has fewer than 40,000 books.

☐ True ☐ False

R27. Each book's barcode is the primary key for the books.

☐ True ☐ False

R28. Librarians have to calculate the return date themselves.

☐ True ☐ False

R29. The morning report lists the books which are more than one week late.

☐ True ☐ False

R30. Members can renew a book for another four weeks on the website.

☐ True ☐ False

Writing

2.5 points

Part A: Translation (W31–W35)

Translate these sentences into Vietnamese (Questions 31–35).

W31. The administrator deployed the new antivirus software to all the computers last Friday.

W32. By running the Monthly Sales report, you can see which products sold best.

W33. After restarting the server, check that all the services are up and running again.

W34. I was typing my password when I noticed that Caps Lock was on.

W35. In this formula, the spreadsheet adds A2 and B2 and then divides the sum by two.

Part B: Instruction email

You are a support technician. Hugo, a sales manager, deleted an important file from the shared drive by mistake this morning. Write an email to Hugo explaining how to restore the file from last night's backup, using the notes below. In your email you must use:
- before or after + -ing at least twice to show the order of the steps (Before restoring…, After opening…);
- by + -ing at least once to explain how to do something (by typing…).
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- open the Backup app on your desktop
- choose last night's date
- find the file: open the Shared Drive folder
- check the file name and date carefully / then click 'Restore'
- open the file / check that it is complete
- reminder: close the Backup app when you've finished

Required language: Before / after + -ing (at least twice): Before clicking 'Restore', check…; After opening the file, check…; By + -ing (at least once): Find the file by opening the Shared Drive folder…; Imperatives with sequence words for the steps.

Write 80–100 words in the body: count from the greeting through the signature; exclude From / To / Date / Subject.

From: _____

To: Hugo

Date: _____

Subject: _____

Hi / Dear Hugo,

It should be quite easy to _____ .

First, _____ .

Then, _____ .

Next, _____ .

After that, _____ .

Finally, _____ .

Don't forget to _____ when you've finished.

Best wishes,

[Full name] _____

[Job title] _____

[Department] _____

Speaking

2.5 points

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. What did you do last weekend? Describe three things using the past simple, and include at least one negative sentence (I didn't…).

2. How can people save time when they use a computer or phone? Answer with by + -ing (By using keyboard shortcuts, you can…).

3. Tell me about a time when something went wrong while you were using a device. Use the past continuous and the past simple (I was …ing when …).

Part 2 (S2)

Explain how to use a database. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

A new shop assistant needs to use the shop's customer database. Explain how to do each task in the cues. Use by + -ing to say how to do each task (You can find a customer by typing…).

- find a customer: type the name in the search box
- add a new customer: click the 'Add customer' button and fill in the boxes
- see today's sales: run the Daily Sales report
- put customers in alphabetical order: click the top of the Name column
- change a phone number: open the record and type the new number

Required language: By + -ing to explain how to do something: by typing…, by opening…, by running…, by clicking….

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

Yesterday you were working at home when your laptop keyboard stopped working. Phone the IT helpdesk and explain how the problem happened and what you did. Use the past continuous for the actions in progress and the past simple for what happened (I was …ing when …; While I was …ing, …).

- 3 p.m.: you / type a report for your manager
- your cat / jump on the desk → a cup of tea / fall onto the keyboard
- while you / clean the keyboard → the laptop / switch off
- you / restart it → some keys / not work
- you / connect an old USB keyboard → finish the report

Required language: Past continuous for the longer action: I was typing…, While I was cleaning…; Past simple for the shorter action and for what you did: the cup fell…, the laptop switched off, I connected….
