Part A

Listen to the phone call and choose the best answer A, B, C or D (Questions L1–L5).

Nadia, a project manager at a software company, gives Mr Grant, the owner of a chain of bakeries, an update on his new ordering app.

L1. What are the programmers working on now?

A. The design of the app
B. The order form
C. The payment system
D. The testing stage

L2. When is Nadia due to show Mr Grant the first version?

A. On 12 May
B. On 20 June
C. At the end of June
D. On 1 July

L3. Who will test the app first?

A. Two new programmers
B. Staff at the new shop in Leeds
C. Ten regular customers
D. Mr Grant and his managers

L4. Why is Mr Grant unhappy about the date when the app goes live?

A. He is going on holiday in July.
B. His customers asked for the app in May.
C. The testing stage will cost too much.
D. His new shop opens before the app is ready.

L5. What does Mr Grant decide?

A. To keep the July date
B. To add two more programmers
C. To pay an extra £3,000
D. To open the shop in July

Part B

Listen to the talk and answer the questions. Write NO MORE THAN THREE WORDS for each answer (Questions L6–L10).

Marco, a software developer, explains how the program for a smart car park works.

L6. What colour is the light above a space when a car is parked there?

Answer (maximum 3 words): _____

L7. How often does the program update the number of free spaces?

Answer (maximum 3 words): _____

L8. What stays closed when all the spaces on a level are full?

Answer (maximum 3 words): _____

L9. What do drivers use to pay?

Answer (maximum 3 words): _____

L10. After what time do the lights in empty areas switch off?

Answer (maximum 3 words): _____

2.5 points · 30 questions

Part 1A: Matching (R1–R5)

Match the terms (1–5) with the correct definitions (A–F). There is one extra definition that you do not need (Questions 1–5).

A. A position in the results produced by a search engine.

B. A machine that can move and do some of the work of a person, usually controlled by a computer.

C. A beta version of software that could become the final product if no serious problems are found.

D. A computer language first designed to produce web pages that change as a result of what the user does.

E. A list of things you can ask a computer to do, which can appear suddenly on the screen.

F. A simple picture or plan that shows which way you need to go to move from one place to another.

R1. Release candidate _____

R2. Pop-up menu _____

R3. Search ranking _____

R4. PHP _____

R5. Navigation chart _____

Part 1B: Grammar (R6–R12)

Choose the best answer, A, B, C or D.

R6. The client wants us _____ a contact form to every page of the website.

A. add
B. adding
C. to add
D. added

R7. Every user _____ to change their password every three months.

A. must
B. has
C. should
D. can

R8. All customer payments _____ by a secure system.

A. process
B. are processing
C. processed
D. are processed

R9. The app _____ by users from our website or from the app store.

A. can be downloaded
B. can download
C. can downloaded
D. can be download

R10. A bug in the last update made the screen _____ black.

A. to go
B. go
C. going
D. gone

R11. Heavy traffic on the server caused the website _____ very slowly.

A. load
B. loading
C. loaded
D. to load

R12. We _____ scheduled to launch the new app next Tuesday.

A. are
B. have
C. do
D. will

Part 1C: Vocabulary (R13–R20)

Choose the best answer, A, B, C or D.

R13. Before writing the requirements, the analyst _____ ten users about their daily work.

A. purchased
B. calculated
C. interviewed
D. debugged

R14. This spreadsheet can _____ how long each stage of the project will take.

A. calculate
B. purchase
C. contact
D. approve

R15. If you have a problem with your order, please _____ our support team by email.

A. purchase
B. contact
C. calculate
D. interview

R16. Customers can _____ concert tickets online and print them at home.

A. interview
B. contact
C. calculate
D. purchase

R17. Your password is _____ information, so never share it with anyone.

A. private
B. public
C. dynamic
D. versatile

R18. This laptop is very _____: you can use it as a tablet, a notebook or a drawing board.

A. private
B. public
C. versatile
D. viewable

R19. The website looks good, but the _____ is out of date: some of the prices are from last year.

A. challenge
B. content
C. combination
D. programmer

R20. The program stops because one _____ in the code tells the computer to divide a number by zero.

A. challenge
B. purchase
C. combination
D. instruction

Part 2A: Reading comprehension (R21–R25)

Read the passage and choose the best answer A, B, C or D (Questions 21–25).

> **Requirements for the CityBikes App**
>
> CityBikes rents bicycles to the public from forty stations in Hue. At the moment, customers rent bikes with a plastic card at each station, but the cards are often lost, and the machines at the stations are getting old. The company has asked a software team to build a mobile app instead. Before the team starts writing any code, an analyst called Linh meets the managers and some customers to find out what the app should do.
>
> The managers want customers to rent a bike by scanning a code on the bike with their phone. Customers have to create an account and add a bank card before their first ride. The app should also show the nearest stations and the number of bikes that are available at each one.
>
> Customers asked for some other features. Many of them want the app to show how far they have cycled. Tourists said that the app needs to work in English, Vietnamese and Korean. One customer also asked for a dark mode for night riding, but the managers decided that this is not necessary at the beginning.
>
> The managers also have one important rule: the app has to stop a customer from renting a second bike before the first one is returned. Linh will write the requirements document this week and send it to the managers by Friday, and the managers need to accept it before any code is written.

R21. Why does CityBikes want an app?

- **A.** Tourists cannot find the stations.
- **B.** Cards are often lost and the station machines are old.
- **C.** The company is opening forty new stations.
- **D.** Customers want to buy bikes online.

R22. How will customers rent a bike with the app?

- **A.** By scanning a code on the bike
- **B.** By showing a plastic card
- **C.** By phoning the station
- **D.** By typing the station name

R23. What do customers have to do before their first ride?

- **A.** Visit the company office
- **B.** Pay a deposit
- **C.** Create an account and add a bank card
- **D.** Return their plastic card

R24. Which feature did the managers decide is not necessary at the beginning?

- **A.** The number of bikes at each station
- **B.** Korean
- **C.** The distance that a customer has cycled
- **D.** A dark mode for night riding

R25. What important rule do the managers have?

- **A.** Customers must return bikes before ten o'clock.
- **B.** A customer cannot rent a second bike before returning the first.
- **C.** Tourists have to pay more than local customers.
- **D.** Each station can only have ten bikes.

Part 2B: True / False (R26–R30)

Read the passage and write T (True) or F (False) (Questions 26–30).

> **How the SmartBell Works**
>
> SmartBell is a video doorbell that was designed by a small company in Bristol. It is connected to the home Wi-Fi network, and its program is updated automatically every month.
>
> When a visitor presses the button, the program makes the camera start recording and sends a message to the owner's phone. The owner can then speak to the visitor through the app, even when he or she is at work. If nobody answers within thirty seconds, the program causes the doorbell to play a short recorded message.
>
> At night, a motion sensor makes a small light switch on when someone walks near the door. However, the light does not switch on during the day. All the videos are stored online for fourteen days, and then they are deleted.
>
> Last year, a mistake in an update caused some doorbells to restart every hour. Customers were not happy, but the company fixed the problem within two days and sent a new update to every doorbell.

R26. The SmartBell program is updated automatically every month.

☐ True ☐ False

R27. During the day, the light switches on when someone walks near the door.

☐ True ☐ False

R28. The videos are stored online for one month.

☐ True ☐ False

R29. A mistake in an update caused some doorbells to restart every hour.

☐ True ☐ False

R30. The company needed more than a week to fix the problem.

☐ True ☐ False

Writing

2.5 points

Part A: Translation (W31–W35)

Translate these sentences into Vietnamese (Questions 31–35).

W31. The release candidate will be given to a small group of customers next week.

W32. Our manager wants the website to load in less than two seconds.

W33. Entering a wrong password three times causes the account to lock for fifteen minutes.

W34. We are scheduled to present the new design to the client on Friday afternoon.

W35. Users have to enter their email address before they can download the free guide.

Part B: Instruction email

You are a web developer. Anna, the new marketing assistant, needs to publish a news article on the company website for the first time. Write an email to Anna explaining how to do it, using the notes below. In your email you must use:
- at least two of should, have to and need to;
- at least one passive sentence (… is shown…, … can be found…);
- be due to or be scheduled to at least once.
Follow the standard layout for an email giving instructions: From / To / Date / Subject, a greeting, It should be quite easy to …, the steps with First / Then / Next / After that / Finally, a reminder (Don't forget to … when you've finished.), then Best wishes and your name, position and department.
Write 80–100 words (do not count the From, To, Date and Subject lines).

- log in to the website's admin page
- click 'New article' / type the title and the text
- add a photo / the photo has to be smaller than 2 MB
- choose the 'News' category
- click 'Preview' / check the article on a phone
- click 'Publish' / the article: scheduled to appear on the home page at 9 a.m. tomorrow
- reminder: log out of the admin page

Required language: Requirements: should, have to, need to (at least two); The passive (at least one): is shown, can be found, is published; Plans and schedules: be due to / be scheduled to + infinitive.

Write 80–100 words in the body: count from the greeting through the signature; exclude From / To / Date / Subject.

From: _____

To: Anna

Date: _____

Subject: _____

Hi / Dear Anna,

It should be quite easy to _____ .

First, _____ .

Then, _____ .

Next, _____ .

After that, _____ .

Finally, _____ .

Don't forget to _____ when you've finished.

Best wishes,

[Full name] _____

[Job title] _____

[Department] _____

Speaking

2.5 points

Part 1 (S1)

Answer the three questions. Speak for 30–45 seconds for each question.

Suggested time: 45 seconds per question.

1. Your university wants a new app for booking study rooms in the library. What should the app do? Use should, have to, need to or want + object + to (I want the app to…).

2. Describe how your university's online learning system is used. Use at least two passive sentences (Lecture notes are uploaded…, Homework is submitted…, Marks can be seen…).

3. Think about a project or assignment that you have to finish this term. Talk about the deadlines and your plans. Use be due to, be scheduled to, plan to or the present continuous for future arrangements.

Part 2 (S2)

Explain the structure of a website. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

You designed a website for a new restaurant. Explain to the restaurant owner how the website is organised, using the cues. Use at least four passive sentences (is linked to, is updated, can be booked, are uploaded, is answered).

- home page → linked to four sections: Menu, Book a Table, Photos, Contact
- Menu: updated by the chef every week
- Book a Table: tables booked online, confirmation sent by email
- Photos: uploaded by staff after special events
- Contact: form answered within 24 hours

Required language: The passive (at least four sentences): The home page is linked to…; The menu is updated…; Tables can be booked…; Photos are uploaded….

Part 3 (S3)

Deal with the situation. Speak for 1–1.5 minutes.

Suggested time: 90 seconds.

You are a systems analyst. Yesterday you met the manager of a language centre to discuss a new app for students. Now report the requirements to your development team, using the cues. Use should, have to and need to, and want + object + to-infinitive at least twice (The manager wants the app to…, Teachers want students to…).

- students: check their timetable and room numbers
- teachers: upload homework / students submit it in the app
- manager: students pay course fees online
- the app: must work in Vietnamese and English
- deadline: first version ready in three months

Required language: should, have to, need to for requirements; want + object + to-infinitive (at least twice): The manager wants students to pay…; Teachers want the app to….
